OPEN DRIVE FOR FIRE DEPT. FUNDS

Fine Support Given Movement For Fire Dept. At New Lenox

Gilbert A. Tracy, who was chosen as president of the committee formed recently at New Lenox for the purpose of creating a local fire department reports that the proposition has been receiving very hearty and favorable support.

Several subscription lists have been placed in circulation for the purpose of raising funds for purchasing a fire truck and Mr. Tracy reports that thus far, over \$300 have been subscribed. Just as soon as a sufficient amount has been raised to warrant the purchase of the truck, the fire department will be organized.

According to present plans, the truck with the booster tank, holding several hundred gallons of water will be purchased, but no chemicals will be used, as it is said they have been found not as satisfactory as the regular water tank equipment. A number of models and designs of trucks have been inspected and the one that seems to answer the purpose for the proposed New Lenox Fire Department was seen at the Darling Manufacturing Company in Chicago.

The plans for the fire department are for a rotating membership list, that is, a certain number of men of the township will serve as firemen and one group will serve for a certain term of weeks and then be followed by another and so on.

The next plan is to try and secure a WPA grant for the erection of a concrete one story fire engine house. It is said that such a building could be erected at a minimum cost and that the land for a fire engine house site has been promised as a donation. In order to make the proposed fire department as near 100 percent perfect as possible, the plan is to have a chart prepared showing the exact location of every farm in the township.

Also in the information, would be whether there is water supply on such farm. This chart and information would be posted in the fire engine house and whenever a fire alarm came in, the firemen could tell at a glance just where the farm is located, who lives on it, what the nature of its water supply is—a drilled well, cistern or an open stream.

Mr. Tracy is very much encouraged by the fine support that has been accorded the undertaking, and feels that within another few weeks the organization of the fire department will be perfected.

Other officers of the present organization are O. V. Rowe, Secretary and Ellis L. O'Daniel, Treasurer.

New Lenox not being incorporated, has no water department or mains, but in case of fire in the village, water could be pumped from Hickory creek. In order not to create any extra load, it has been decided to raise the money by popular subscription for the purchase of the needed fire equipment for the township fire department. All the services of the firemen will be voluntary.

New Restaurant And Tavern For New Lenox

Excavation work for the new tavern which Mr. Ziegler is going to build on the former site of the Green Tavern in New Lenox on the Lincoln Highway will be completed this week following which building operations will be begun. In excavating for the basement which is to be 26 x 48 feet, a solid rock foundation was struck at the depth of 3 1/2 feet.

The new building is to be two-story, in which a tavern and restaurant will be located on the ground floor with living quarters on the second floor.

The exterior of the first floor will be of asbestos shingles. It is expected that the new building will be completed late this fall.

Orland Woman's Club Will Hold Pageant Sept. 30

A pageant, entitled, "Brides of All Ages" is to be staged by the Orland Park Woman's Club in the Orland Park M. E. church. It is urgently requested, that anyone having a wedding dress, white or colored, of any style, belonging to present or past generations, will please contact the chairman of the Bride's Festival, Mrs. David Kreuger, Orland Park, Phone 117-R.

DEATH COMES TO AGED TINLEY PARK RESIDENT

One of Tinley Park's oldest residents, Peter Wannamacher, aged 84 years, passed away in his home in Tinley Park Tuesday evening at six o'clock. He had been critically ill all summer.

Mr. Wannamacher was born in Frankfort township, near Mokena, July 17, 1856, the son of John and Sophia Wannamacher. On September 12, 1878 he was united in marriage with Dorothea Mancke. They made their home on a farm in Frankfort township near Tinley Park until twenty years ago, when they retired and located in Tinley Park.

Surviving are the widow, Dorothea; three sons, William, Peter and George; two daughters, Mrs. Emma Vogt and Mrs. Rose Ganzer. Three sons and one daughter preceded him in death.

Other survivors are: one brother, Herman; a sister, Margaret Vogt; 17 grand children and two great grand children.

Funeral services will be conducted Friday afternoon at three o'clock in the late home in Tinley Park and at 3:30 o'clock in the Trinity Lutheran church at 159th street and Oak Park avenue, Rev. Martin Frick officiating. Burial will be in the church cemetery.

Work Begun On New Mokena Beauty Parlor

Richard Hensel Mokena Druggist, is remodeling the store space directly west of his drug store on Front street, which he has rented to Mrs. Wanda Brandom of Joliet, proprietor of the La Donna Beauty Shoppe, who will establish a beauty parlor in Mokena.

The new business place will be known as the Mokena Beauty Shoppe and will be a great asset to Mokena and surrounding towns, as well as a welcome convenience to our citizens.

Mrs. Brandom is a graduate, licensed beauty operator and is known to many Mokena ladies, having done work for them in Joliet Beauty parlors. She will have a modernly equipped shop.

Watch for opening date and announcing this business.

Medical Center Opened In Tinley

Tinley Park is about to have a new medical center, to be located in the Schreiber building in connection with the dental office of Dr. Enoch.

According to the set-up, three doctors will maintain office hours and their services will consist of ear, nose, throat and eye treatments.

Following are the members of the new clinic: Paul K. Anthony, graduate of Loyola, post graduate work at Milwaukee County and Children's hospital; on the staff of Holy Cross hospital; staff of Mercy Dispensary; St. Bernard hospital; member of Health Infant department in charge of a large orphanage.

Walter M. Eisen, graduate of Loyola University; maternity obstetrics, gynecology and surgery attending obstetrician at Holy Cross staff; member Mercy Dispensary and Lewis Maternity; post graduate work at Lewis; member of Board of Health obstetrical department.

Clifford Sullivan, graduate of Illinois School of Medicine, ear, eye, nose and throat; post graduate work at Cook county hospital; attending staff at Holy Cross at St. Bernard's.

These three doctors will have office hours from 12 noon to 2 o'clock as follows: Dr. Anthony: Monday and Saturday.

Dr. Eisen, Wednesday and Thursday and Dr. Sullivan, Tuesday and Friday. All evening office hours by appointment.

Belated Apple Tree Blossoms

An apple tree which was backward in blooming last spring, has burst out in full bloom the past week. The tree is in the yard of N. F. Heiman in Mokena.

County Clerk Informs Voters On Vital Issue

County Clerk Henry Koerner of Will County has given the voters of his county a very noteworthy service the past week when he mailed each voter in the county a pamphlet on the important proposal to amend the state constitution and to amend the banking law so that the present provisions making stockholders of

County Clerk Henry Koerner

banks personally liable for obligations of the bank be repealed.

It is very important that every voter vote "Yes" on the constitutional amendment at the election on November 8th.

The voters of Will County appreciate Mr. Koerner's fine spirit of service.

Frankfort Hall Sale Saturday

Spirited bidding is anticipated at the sale of the Frankfort village hall and several buildings adjoining the property when they will be sold at public auction Saturday afternoon of this week.

These buildings are to be removed to make room for the new village hall on that site. It is understood that some bids have already been made for some of the buildings but these bids can not be accepted at this time but can be put in at the time of auction.

Mokena Band Concert Sept. 24

The Mokena band will sponsor a free band concert on the depot grounds in Mokena Sept. 24th. In event of rain the concert will be held the following Wednesday night.

To Hold Annual Mission Festival

The annual Mission Festival will be held on Sunday, Sept. 18 in the Immanuel Lutheran church in Mokena. Services will be as follows:

German service at 10 a. m. Rev. H. Harthun of Lansing will be the guest speaker.

English service at 8 p. m. Rev. George W. Wittmer of Peoria will be the speaker.

Sunday school at 9 a. m.

To Hold Bazaar

Have you heard? About the big affair?

What? St. John's Ladies Aid bazaar in Mokena Oct. 26. Watch and see what we have to say next week.

Skull Fractured When Kicked In Face By Horse

Leroy Bettenhausen, 22 years old, son of Mr. and Mrs. Wm. H. Bettenhausen and a second cousin of Sup. W. C. Bettenhausen of Green Garden township where he also resides, suffered a fractured skull when he was kicked in the face by a horse last Friday afternoon. He was taken to the Silver Cross Hospital in Joliet.

The horse, 6 years old, was regarded as gentle and no account for the horse's action has been given.

To Hold Benefit Dance Friday Nite

A benefit dance will be held at the Colonial dance hall in New Lenox this Friday night, Sept. 16.

BULL ATTACKS FRANKFORT TWP. TAX COLLECTOR

George Mager, Frankfort township tax collector, and well known farmer of this section, was attacked by a bull while in a field on his farm Monday morning. The animal knocked him down but a hired man attracted the attention of the bull by his shouts which enabled Mr. Mager to get to a fence, but in his hurry to get thru the fence, he cut his hands quite severely on the barbed wire.

Mr. Mager immediately got in his automobile and drove to the office of Dr. W. V. Hedges in Frankfort. On investigation it was found he had sustained a broken rib and a number of bruises.

Tinley Civic Club Hears Report On Sewer Plant

The chief topic of discussion at the Tinley Park Civic Club meeting held in the Tinley Park school Monday evening, was the installation of a sewerage treating plant at Tinley Park. A special investigating committee which had been appointed by the Civic club at a previous meeting headed by Herman Klann of Tinley Park rendered a very comprehensive and interesting report of the various treating plants visited in Cook county, they being those at Homewood, Flossmore, Chicago Heights, Glenwood, Hinsdale and some other places.

The report was accompanied by pictures showing the interior and exterior of the places visited and with each set of pictures, was a very concise and complete summary, giving the date of construction, cost of maintenance and so forth. Two representatives from Glenwood were present, namely Mr. Michaels and Mr. Hasen Kaster. They rendered reports relative to the installation of a treating plant at Glenwood.

They pointed out that they had at first considered this as a WPA project, but found that the plant could be built at a far less cost and in shorter time by awarding the project to a private contractor which was done and the plant completed at a cost of \$18,000 or half of what it would have cost under WPA. A number of other interested parties pointed out that PWA or WPA in either case would prove far more expensive than if handled by private contractors. Others were of the opinion that it would be cheaper for Tinley to make application for entry into the Sanitary District system. Others suggested placing large concrete tiles in the drainage ditch and covering them with earth as far as the village limits run as a means of answering the sewer problem.

Another suggestion advocated the creation of local sanitary district. The club accepted the reports of the committee on sewers and turned them over to the village board for their consideration and action.

It is said a sewerage treating plant large enough to take care of Tinley would cost approximately \$38,000. In addition to this would be an extra cost for sewer tile, etc.

Mokena Arrest Case Continued

The case of the Village of Mokena against Henry Yunker of Mokena on a charge of running a stop sign which was to have been heard before Police Magistrate Albert Hentsch last Monday night has been postponed for ten days.

Orland Fire Dept., Has Two Fire Calls

The Orland Park Fire Dept., had two out of town fire calls last week. Tuesday night about 11:30 p. m. they were called to the Mike Oswald grove when a frame house east of the Oswald grove caught fire. The flames had made such a fast start that the place was beyond saving and it and all the contents were destroyed.

Thursday morning at 1:30 they were called to the Wm. Tilsy farm on 143rd street where fire of unknown origin had broken out in the summer kitchen. Altho the fire had made rapid headway, the firemen extinguished the blaze after a hard fight.

Mokena Band Asso. To Sponsor Own Amateur Show

The Mokena Band Parents Association are making preparations for launching a two night all-home talent amateur show to be held on Thursday and Friday nights, November 3rd and 4th in the Mokena school auditorium. Prizes will be awarded for the best acts of any type of entertainment.

If you are interested in taking part in this show and to compete for a prize, fill out the following blank and mail it at once to box 123, Mokena, or phone Mokena 61W.

Name
Address
Phone No.

I would like to take part in the Mokena Band Parent's Amateur Show. Details of act, or instrument I wish to play are:

Orland Doctor Leads Highway Cops Merry Chase

Dr. W. R. Schussler of Orland Park had a thrilling and interesting experience Monday morning. He was engaged in placing a cast on the broken leg of a patient in the Burnside hospital when he received an emergency call to rush to the Kovac home on 159th street southwest of Orland Park.

He quickly got in his automobile and started down 95th street at 70 miles an hour and when he hit the Southwest Highway he opened up to 90 miles an hour.

Immediately he had traffic cops on his trail but he outdistanced them and by the time he reached Orland he had lost the cops. He stopped at his home to pick up needed equipment and when he started down 143rd street, the cops were waiting for him and stopped him. He identified himself and said the reason he had to break all speed limits was due to the emergency case and he was permitted to proceed. Upon completing the call, he found the cops waiting for him in front of the Kovac farm gateway. They were satisfied everything was all right and told Dr. Schussler there would be no ticket. Dr. Schussler drove back to Orland Park and then started back to Burnside and as he came to the Southwest Highway and 95th street he saw the same highway police had arrested a woman automobile driver for doing 85 miles per hour.

The case Dr. Schussler had been called on was that of Richard Kovac 25 years old who has been ill for sometime with a heart ailment. He went into a coma Monday morning and has been in a serious condition since.

MRS. A. FULTON OF TINLEY PARK DIES SUDDENLY

Mrs. Albert Fulton widely known resident of Bremen township passed away very suddenly at her home Tuesday noon. She had been in Tinley Park the day before and appeared to be in her usual health. Mrs. Fulton suffered a stroke of apoplexy Tuesday and passed away at 12:15 p. m. of the same day.

Anna Henrietta Kruspe Fulton was born in Orland township Oct. 31, 1870. She was baptized and confirmed in the Trinity Evangelical Lutheran church north of Tinley. On October 31, 1891 she was united in marriage with Albert W. Fulton of Bremen township. Two children were born to bless this union. Leila Fulton Moss and Leonard E. Fulton who survive. The husband passed away March 28, 1930.

During his life Mr. Fulton was prominently identified with the official life of Bremen Township having served as assessor for many years.

Mrs. Fulton was a charter member of the Tinley Park RNA. She resided on the old home stead since her marriage in 1891 until March of this year when she went to keep house for Mr. James Keleher whose wife passed away a year ago.

She leaves to mourn her untimely death beside the two children before mentioned, two sisters, Mrs. Ricka Koehler of Morgan Park and Minnie Schmidt of Chicago; three brothers William and Charles Kruspe of Chicago and Christ Kruspe of Hammond, Indiana and also many other relatives and a host of friends.

Funeral services will be held Friday afternoon at two o'clock from the Funk and Adler Chapel in Oak Forest. Burial in Burr Oak cemetery.

Coming Events

- Sept. 16—Benefit dance at New Lenox.
- Sept. 24—Mokena Band Concert.
- Sept. 28—Tinley R. N. A. Bunco party.
- Sept. 30th — Orland Women's Club Pageant.
- Oct. 26th—St. John's Ladies' Aid Bazaar, Mokena.
- Nov. 3rd and 4th—Mokena Band Association Amateur Show.
- Sept. 25th — Change clock to Central Standard time.
- Golden Jubilee Christ Lutheran Church, Orland Park through the month of September.

Buys 615,000 Brick

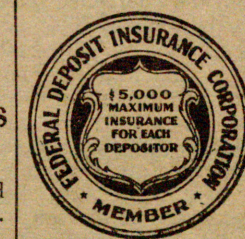

Wm. Funk of Tinley Park who built a number of brick buildings in Tinley Park and Oak Forest in the past 30 years, has purchased a total of 615,000 brick, which is a record for an individual purchaser.

SYNOPSIS

Richard Exon, a poor young Englishman, befriends elderly Matthew Gering, who at his death, gives him a statement claiming he, Gering, is Rudolph Elbert Virgil, Count of Brief, of ancient Austrian nobility who was betrayed 20 years before by his twin brother, Ferdinand, whose sentence for forgery he himself served. Ferdinand appropriated his title, property and daughter. Before he dies, Gering tells Exon there is a family secret, known only to the head of the house, to be found in the great tower at Brief, by a doorway none can ever find. Exon inherits his uncle's fortune and sets out to right Gering's wrongs. En route he encounters Percy Elbert Virgil, son of the villainous Ferdinand and sees him in conference with Inskip, a diamond merchant. He engages a valet, Winter, who hates Percy and meets by chance at a garage, John Herrick, who is a linguist and who as a youth served as a page at Gering's wedding, and had visited Brief. Herrick agrees to aid Exon. They establish headquarters at Brenda Revoke's farm at Raven, a few miles from Brief and make their plans. They find the castle almost inaccessible. They see a closed car occupied by Percy Virgil, a chauffeur and a woman. Hearing a dog scream, they see the chauffeur flogging it, just as a horse with a girl astride bounds along the path and is felled by a strung wire. The girl, unconscious, is picked up carefully by the chauffeur and woman, who then run away, after dropping her. Exon rescues the girl and carries her to his waiting car. He identifies the girl as Elizabeth, daughter of the disowned Gering, tells her of her cousin's plot to abduct her and takes her to Raven, where he tells her the story of her father and promises to go the limit to help her right her father's wrongs. Elizabeth wins faith in her benefactor. Percy Virgil brings the police to Raven, announcing that two strangers are being sought for the kidnapping of Elizabeth. Herrick discomfited Virgil, tells of the morning's adventure, names a man called Max and hands the police a sealed envelope with the name of the leader in the abduction—Percy Virgil. Exon and Herrick suspect Percy of having sold the family jewels through Inskip. All realize the only solution is to find the Secret of Brief, which the impostor Ferdinand does not know. They decide to take possession of the Tower.

CHAPTER —IV—Continued

Holding my torch in my teeth, I inspected the four beddings carefully, one by one. There was nothing to choose between them: all were apparently sound. I put my torch away, and tested the bars themselves. The first was not rock-steady; the second, however, might have been a part of the tower.

Clinging to the cage like some ape, I fought to loosen the first, and when I stopped to take breath, I could move it an eighth of an inch.

But for the cage, I could never have done what I did. As it was, I could work with freedom, and, when I was tired, I could rest; and this without the dragging, deadly oppression of what I will call self-support. Never at any time was I holding my own weight up.

Without the mallet, the chisel was of no use, and I could not have used them together, because I had to hold on: but by working the bar to and fro, I gradually crushed the cement which was lying within the sockets between the bar and the stone.

After nearly half an hour this bedding was gone, and I could move the bar sideways a full two inches each way: but wrench it out, I could not, and after a little I knew that its ends had been purposely bent—to defeat the very object I had in view. I could loosen, but I could not displace it, unless I had the strength to pull a stone from the tower.

Now the bars had been set in the wall four inches apart. By holding my bar to one side, I now had a space of six inches between that bar and the next. But that was not wide enough . . . After a moment or two, I began to try to loosen the second bar.

As well try to shake a statue—or so it seemed. As I have said, the thing was a part of the tower. But after ten frantic minutes I felt it stir.

I stopped for a moment to rip off my tie and collar and let them drop. Then I fell upon that bar, like a man possessed.

Twenty-five minutes went by before I had the sockets clear of cement.

If I moved the two bars I had loosened as far apart as I could, I now had a space of eight inches through which to pass; but, short of displacing a bar, I could have no more, for the iron of which they were wrought was not to be bent.

I have sometimes heard said that where a man's head will enter, there his body can pass. On that exacting night I proved that saying untrue. I could put my head into the cage, but, do what I would, I could not pass my body between the bars.

Three feet below me, I saw Elizabeth's upturned face. She was standing on Herrick's shoulders, leaning against the wall.

"What is it?" I whispered. "What is it?"

"Leave it, Richard. You must. No man could do any more, but it can't be done."

It was the phrase she used that opened my eyes.

"No man could do any more." Perhaps. But a woman could.

"Listen," I said, "you've come in the nick of time. Can you see these bars? The two middle ones are played: but I can't move them far-

ther apart, and I'm too big to get through. But you can pass easily—and the window is open beyond . . . Very well. In a minute I'm going to lean down and pick you up, but not by your hands—by your belt. Put your hands above your head, as though you were going to dive: and when you come up to the bars, just wriggle your way between them and get a knee on the sill."

Without a word, she put up her hands as I said, and I disposed myself as well as I could.

Holding fast with my left to a cross-bar, I reached my right hand down till I touched the small of her back. Then I took her by the belt of her breeches and lifted her up.

She could not have played her part better, if we had rehearsed the maneuver a score of times. As she came to the bars, she turned sideways, her back to me; and before I knew where I was, she had taken her weight.

And then it was all over, and she was within the tower—standing,

since, before we came in, we had gathered the scraps which had fallen whilst I was at work, there now was nothing to show that the cage had been tampered with.

Then I joined my lady and Herrick, who were surveying the stair.

If this was dark by night, it was dim by day, and we could do nothing useful without the help of a torch: so, though we had not brought Brenda with that idea, she had very soon to come to Elizabeth's aid: together they shed the light, whilst Herrick and I conducted the actual search.

That the work would require great patience was presently clear, for the walls seemed to be as blank as an untouched page, yet we could not believe that a doorway could be concealed in the steps.

"You must go up, counting your steps . . ."

Not until that time did I at all understand the portion confronting the prisoner of ancient days, who set himself to discover a way to break

brains . . . Well, I'm going to give mine a show now—before it's too late."

With that, he walked into the bathroom, to have his head and his hands, and I sank down on the bed and did my best to marshal my weary wits.

"He's right," said Elizabeth, slowly. "One always begins the wrong way. Once we'd been over the ground, we ought to have sat down quietly and let our minds play upon the puzzle. You know. Like doing a crossword."

"That's all very well," said I, accepting some tea from Brenda, who showed no sign of fatigue. "But who could do a crossword without any clues?"

"We've got two clues. We know that a doorway exists: and we know that, to reach that doorway, we've got to go up the stairs. If—"

"My God," said I, starting up. There was a moment's silence.

Then—

"Go on," said Elizabeth, quietly.

"What do you know?"

"Your father said that there was in the tower a doorway which no one would ever find. And then he used the words 'you must go up, counting your steps.' But he never said that the doorway was on the staircase. He said it was in the tower."

"You mean—"

"I mean that we have been looking for a doorway which we can reach from the stair: but we ought to have been looking for something upon the stair which, when we have found it, will disclose where the doorway is."

"That's right," said Herrick's voice. "And the stairway bears him out. There is no doorway there—I think we can swear to that. But there is a spring or something which, when we can touch it off, will open some hidden door in another part of the tower."

The case was now greatly altered. We knew that the path we were on was the right one and very soon would bring us up to our goal.

And so it did.

Not more than an hour had gone by when I found on the thirty-sixth step a nick which might have belonged to the lid of a pencil box. It was cut in the tread of the step, close to the edge and close to the outer wall. It was choked with a cake of dirt which I had to cut out with my knife, and an obstinate film of dirt was encrusting that side of the tread; but when I had used a wet cloth to rub the stone clean, there were the parallel cracks which I had expected to see. In a word, I had found a panel—a tiny, sliding panel which, if I could draw it towards me, would discover a slot in the tread, three inches by two.

(Here, perhaps, I should say that I have now no doubt that the film of dirt on the tread was more than the natural deposit which time will lay, and that, after replacing the panel, the late Count of Brief had washed the stone with some liquid which, when it was dry, would form an invisible skin.)

Half an hour went by before the little panel allowed me to have my way. Then at last, with a crack, it yielded, and two minutes later I drew it out of the tread.

Its withdrawal disclosed no slot, but a miniature well, rather more than an inch across; and sunk in this well was a bolt of very old iron.

At once we saw that the bolt was thus holding in place the rise of the step upon which we were now at work, and that if we could pull the bolt up, the rise would be free to be moved.

(TO BE CONTINUED)

Science Has Ousted Old-Time Sourdough; College Men Now Hit Canada's Gold Trail

The grizzled old prospector, the sourdough trail blazer through the northern wilderness, has not disappeared from the scene but is gradually vanishing from Canada's gold trails, writes a Vancouver (B. C.) United Press correspondent in the Detroit Free Press.

Some have followed the modern trend to the airlines, while new-fangled gadgets explore the secrets of the earth and modern aerial photography eliminates the guesswork in the present day quest for gold.

Still the veterans and the younger men swarm over Canada's hinterland in search of the "gold in them thar hills," but modern mining men agree that they belong to the lost legion.

The yellow metal is still "where you find it" but modern science is finding it first. It is the era of the geologist, the college-trained miner.

Geophysical prospectors reveal what lies under the glacial layer which covers the dominion. This year the Canadian government will send 40 such expeditions into the northern mining areas.

In the Cariboo district of British Columbia placer mining is still in evidence and hundreds of men have

gleaned a living by panning the creeks, encouraged by high gold prices in world markets.

But primitive panning methods have given way to scientific geophysical panning, and large companies explore the earth, 600 or more feet deep, for old pre-glacial creek beds.

The drill of the hard-rock miner has displaced the pick and shovel of the surface miner, and in the Yukon old style placer mining has been discarded for huge dredges.

Guessed Wrong

According to the prophecy in St. Peter's epistle the medieval church expected the end of the world to be near. The first century passed without this catastrophe occurring. Gradually as the year 1000 approached all Christendom feared the millennium. Crowds renounced their earthly possessions and fled to Mount Zion where it was rumored that Christ would appear. In America, William Miller started a group of Second Adventists or Millerites who waited in vain for the end of the world in 1844. There have been various times since this when the coming doom has been prophesied.

Braid Trimming Is Smart

give this design an unusually good figure line.

The Panty-Frock.

High waistline, puff sleeves, square necklines—they all look adorable on little girls. This flaring frock buttons down the front so that ambitious tots can easily dress themselves in it. This design will be pretty in so many different materials—gingham, challis, percale and dimity. A dress-up version in taffeta will be sweet, too; trim that with ribbon instead of the braid.

The Patterns.

1570 is designed for sizes 34, 36, 38, 40, 42, 44, 46 and 48. Size 36 requires 4½ yards of 35-inch material without nap; 2¾ yards braid to trim.

1516 is designed for sizes 2, 4, 6 and 8 years. Size 4 requires 3 yards of 35-inch material; 4½ yards braid or ribbon to trim; 1½ yards ribbon for belt.

Fall and Winter Fashion Book.

The new 32-page Fall and Winter Pattern Book which shows photographs of the dresses being worn is now out. (One pattern and the Fall and Winter Pattern Book—25 cents.) You can order the book separately for 15 cents.

Send your order to The Sewing Circle Pattern Dept., Room 1020, 211 W. Wacker Dr., Chicago, Ill. Price of patterns, 15 cents (in coins) each.

How Women in Their 40's Can Attract Men

Here's good advice for a woman during her change (usually from 38 to 52), who fears she'll lose her appeal to men, who worries about hot flashes, loss of pep, dizzy spells, upset nerves and moody spells.

Get more fresh air, 8 hrs. sleep and if you need a good general system tonic take Lydia E. Pinkham's Vegetable Compound, made especially for women. It helps Nature build up physical resistance, thus helps give more vivacity to enjoy life and assist calming jittery nerves and disturbing symptoms that often accompany change of life. WELL WORTH TRYING!

In an Emergency

We never can tell what is in a man until an emergency calls out his reserve, and he cannot call out an ounce more than has been stored up.—Warren.

They're Able to Collect

No economic reform that seeks to make it easier for the incompetent, lasts long. The competent demand full pay, sooner or later.

Everyone of us ought to own a small piece of the United States. It is such a solid foundation for patriotism.

A man does have occasional spells of relief. He wakes up to find it was only a nightmare.

Golf gets men into the outdoors, but does it really inspire in them a love of nature?

Attagirls!

Girls who marry do not make so many miscalculations as you think; but they heroically take a chance.

No matter how many suckers there are, we'd hate to take one in. We'd feel cheap.

If one is an intelligent man, he can enjoy his college education even if it doesn't aid him to make money.

Sentinels of Health

Don't Neglect Them!

Nature designed the kidneys to do a marvelous job. Their task is to keep the flowing blood stream free of an excess of toxic impurities. The act of living—life itself—is constantly producing waste matter the kidneys must remove from the blood if good health is to endure. When the kidneys fail to function as Nature intended, there is retention of waste that may cause body-wide distress. One may suffer nagging backache, persistent headache, attacks of dizziness, getting up nights, swelling, puffiness under the eyes—feeling tired, nervous, all worn out.

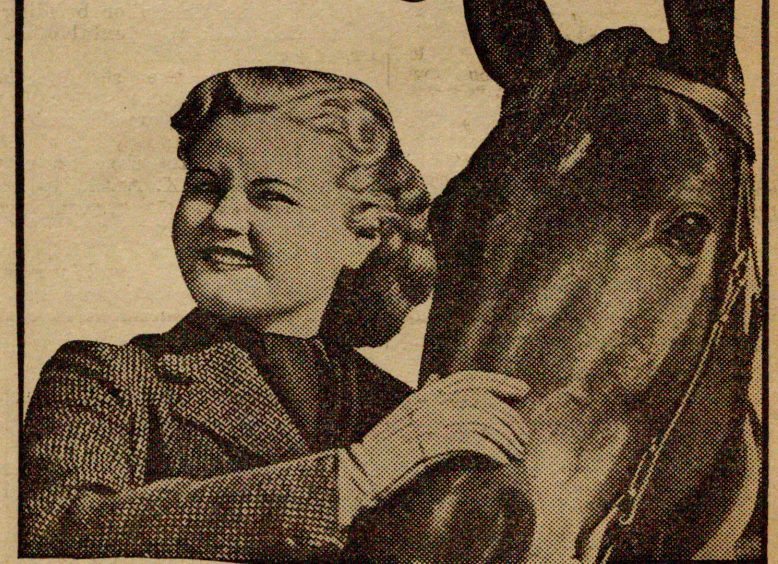

Frequent, scanty or burning passages may be further evidence of kidney or bladder disturbance. The recognized and proper treatment is a diuretic medicine to help the kidneys get rid of excess poisonous body waste. Use Doan's Pills. They have had more than forty years of public approval. Are endorsed the country over. Insist on Doan's. Sold at all drug stores.

A TITLE QUESTIONED

"Do you feel that study has made you a more successful agriculturist?"

"Not exactly," answered Silas Cornstossel. "I keep practicin' new ideas, but I believe life was more secure when I was satisfied to be a plain farmer."

Surgery Sally

"I can't quite diagnose your case. I think it must be drink."

"All right, doctor. I'll come back when you're sober."

Well, Maybe—

"I don't think there is anything that beats a really good wife."

"What about a bad husband?"—Providence Journal.

THE SCHEMER

Photographer (to Jones, newly wed)—You must try and look less fierce. Otherwise your portrait will be terrible when developed.

Jones—That's all right! My wife's sending one to her mother, who has never seen me before.—Royal Arcanum Bulletin.

"IRIUM Won Us!" Say Millions of Pepsodent Powder Users

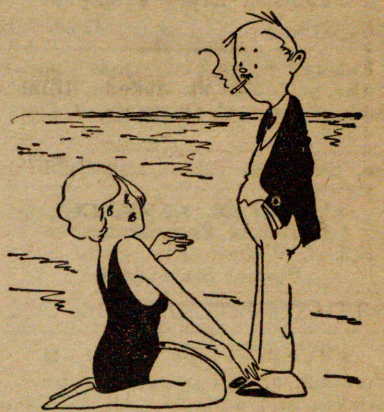

Pepsodent alone of all tooth powders contains remarkable Irium!*

*Mirrors don't lie! So for the true facts about the remarkable effectiveness of Pepsodent Powder containing Irium, consult your mirror! Examine your teeth closely . . . tonight. Then switch to Pepsodent Powder. Use

it regularly . . . twice a day. After a short time, again examine your teeth in a mirror. Expect a real improvement! . . . For Pepsodent is faster . . . more effective and SAFE in its action on teeth! It contains NO BLEACH, NO GRIT! Buy it now!

*Pepsodent's trade mark for Purified Alkali Sulfate

THAT'S TELLING HER

She—So you say you'll never marry? Why?

He—I wouldn't marry a girl who wore a one-piece bathing suit, and I'd never be happy with a wife when all the other girls are wearing 'em.

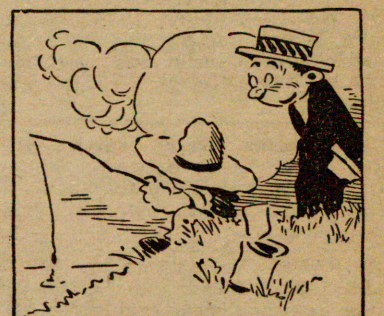

FRESH FROM THE FARM

Boarder—What's the matter?

Farmer—Here I send Willie down to the village for vegetables and he comes back without a can opener.

AND HE KNOWS

Onlooker—It takes patience to catch those fish, I suppose?

Young Fisherman—No, mister—it takes worms.

IN THE RUNNING

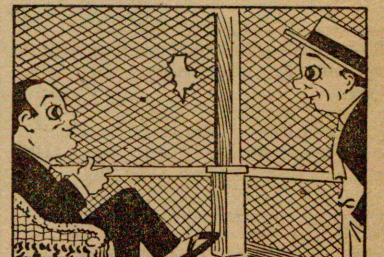

"Mrs. Riche is being heavily sued by Miss Poore for running her down."

"With her car, of course?"

"No—with her tongue."

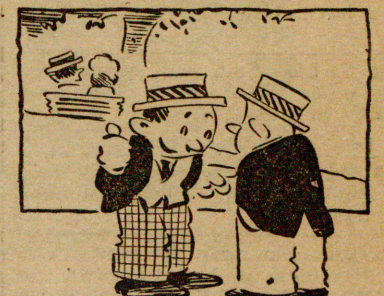

FOOLING THE FLIES

"Why did you put a hole in your screen?"

"A new scheme, after all the flies in the neighborhood get in, we close it and go outside for a little rest."

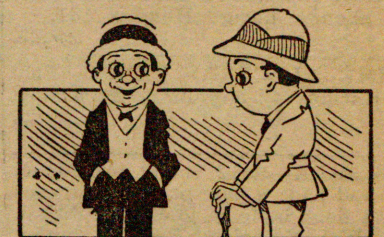

THE LISTENING POST

"Are they in love?"

"They must be; she listens to him describe a ball game and he listens to her describe a gown."

SOME MISTAKE

Friend—So you regard the Himalaya mountains as the most remarkable spot on earth?

Traveler—Decidedly so. I found the advertising bill poster has left the region wholly untouched.

TINLEY PARK

Miss Elfrieda Schmidt who recently has returned from a ten months trip through Europe, left this week for a trip to Santa Barbara, California.

Mr. and Mrs. J. S. Oulman enjoyed a boat trip on the Roosevelt, to South Haven recently, where they were met by their daughter, Mrs. Elkauch B. Asher and motored from there to Glen, Michigan and returned to Tinley Park last Sunday. They enjoyed a visit also in the Al Perry home, and with Mrs. Grace Asher's children from Colorado who were home for Labor Day.

The Tinley R. N. A. held their social meeting Tuesday. The hostesses were: Neighbor, Steinhagen, Clemens, Chapman and Potberg. The public card and bunco party will be held September 28, with Ruth Freitag taking the place of Gertrude Jacobs as chairman of the event. A lovely all wool blanket will be awarded that evening.

The Charter was draped for Neighbor Anna Fulton who passed away Tuesday morning. She was a manager of the Camp for this term and a Charter member since March 2, 1900.

Commander Baldwin reported the happenings at the State Convention, held at Rockford, Illinois the last week of August. His report was concerning the business sessions and gave a detailed report of the daily work. A verbal report was made by a number of Legionnaires from our Post to the convention who reported on the side issues, stating how traffic should be properly directed, best methods of how morning papers should be sold, tastiness of 7-Up as a drink, and how to travel with Other Legionnaire's wives, when friend hubby leaves them to themselves.

The next meeting is scheduled for Tuesday night Sept., 19th. Eats will be served, so let's all be present and show Commander Baldwin that the Post is behind him 100 percent.

Boyd H. Carr, Pub. Ch.

Scout, News Troop 53
By "The Little Chief."

Our weekend camp in the Dunes is over. A real good time was had even tho the weather was not real favorable.

We camped on a large sand dune about 60 feet high, over-looking Lake Michigan. The camp made a grand sight. All the pup tents were put up in a circle and each tent had their cooking fire out in front. Two boys were in a tent and it was their duty to erect the tent, cook their meals together and to care for their tent at breaking of camp.

Sunday morning after breakfast everybody donned bathing suits and spent some time seeing how far they could jump down the side of their camp dune. Should any be interested in jumping off sand dunes, may I suggest that you get in touch with Elsworth Wannemacher. He will answer all your questions and tell you how it is done.

After dinner Sunday, we loaded the truck for home as it started to rain. A large tent, donated for Scout use by Mr. Baldwin, was put over the back of the truck to keep out the rain. The boys seemed to enjoy it even though conditions were not so good. So ended another camping trip for Troop 53. There will be day hikes this fall, but camping season is over.

The chill winds will soon blow, the green leaves will turn to shades of autumn, then fall to the ground. All this is just a gentle reminder that the time for outdoor Scouting activity is over and we must settle down to the more serious part of Scouting and pass some tests. Our experience this summer, though we got a late start, should help us in many ways to broaden our knowledge of scouting and help us pass our tests more easily.

Last Friday night, the Scouts with bicycles, started to practice for the drill which they will do in the Scout circus on October 8th. We would like to have a good crowd from Tinley Park to attend.

All Boy Scouts will have tickets for sale. The price will be reasonable so let's hold October 8th open and all go to the circus.

A hearty welcome to our new Scouts, Ralph Andres, Helmi Beckler, and Floyd Klepper.

Pinochle Tournament Plans Progress

The plans for the Women's Benefit Association Pinochle tournament are going along very smoothly. The ladies report the Business Men of Tinley Park have been very generous in their contributions of prizes to be given each night and at the end of the series. With the liberal support of these businessmen and the fact that the people will realize the opportunity for much enjoyment by competing for prizes of real value, the success of the tournament is now assured.

The ladies of the WBA wish to take this opportunity to thank each and everyone who has donated towards this affair and to advise anyone interested, that it will be to their advantage to attend as many of the sessions as possible. The names of the donors will be given at a later date.

LOST—Valuable ladies wrist watch. Reward. Finder please notify the News-Bulletin office. 1c

WANTED—Excavating, tiling drain work. Contract work includes free surveying. Five cents a rod discount on all work contracted in September. Peck-the-Tiler (Roy Hannum) 6724 North St., Tinley Park, Ill.

American Legion Items

The regular meeting of the Legion was held Tuesday night with the newly elected officers presiding. Commander Frank Baldwin made an imposing impression and conducted the meeting in fine style.

Regular business was the order and the meeting was a most harmonious and enjoyable occasion. Our Field Piece, which is at present, being stored at the Beaty Lumber Yard is causing much work for the boys who are obtaining permission to erect a suitable and permanent site for a placement for the cannon. Permission is being obtained in the parking place north of the tracks on Oak Park Avenue, but the needed reservation, legal procedure and necessary permit from the Rock Island railroad is holding up the erection at present, but the committee reported that this difficulty would soon be overcome.

Mr. and Mrs. Fred Lewer and son, Dick of Ramondsville, Texas arrived here Monday to visit with her sister Mrs. E. P. Keup and family. Both families were visiting many friends which they had not seen for some time, in Chicago Heights Tuesday.

A birthday supper was given in honor of Raymond Dieball of Blue Island in the Standee home Sunday. Guests included Elizabeth English, Vera Herrington and Ervin Batterman of Tinley Park and Robert Cox, Mr. and Mrs. Robt. Olson and Mr. and Mrs. J. L. Standee of Chicago.

Russell Gunn left Tuesday evening to visit relatives in Canada for several weeks.

several weeks.

Ervin Batterman visited his parents in Beecher last Wednesday.

Robt. Black celebrated his birthday Tuesday at the home of his aunt and uncle, Mr. and Mrs. Holman of the South Subdivision.

Mr. and Mrs. Chas. James were surprised in their home last Wednesday in honor of their third wedding anniversary. Those present were: Mr. and Mrs. Herman Freitag, Mr. and Mrs. Chas. Walan, Mr. and Mrs. Walter Johnson and Mr. and Mrs. True Daniels.

Walter Mancke, G. Dini, John G. Poorman left Sunday morning for Wis., on a fishing trip and expect to return home the latter part of the week.

P-T-A. A. NEWS

On Friday September 9 at 2 o'clock the Tinley Park PTA held their first meeting of the year. It was conducted by their new president Mrs. Walter J. Johnson. She introduced her new chairmen and they in turn gave a brief outline of their plans for the coming year. At the end of the meeting a reception to the teachers was held. Mrs. Lulu Rodgers acted as hospitality chairman and Mrs. W. Bennett was in charge of the refreshments. A list of the chairmen will be published at a later date due to a change in plans. Mrs. Walter Eickelberg, pub. chair man.

How happy all of us are to be back in school again. We have a big enrollment this year and should have

CHRISTIAN SCIENCE CHURCHES

"Substance" was the subject of the Lesson-Sermon in all Churches of Christ, Scientist, on Sunday, September 11.

The Golden Text was, "Blessed are they which do hunger and thirst after righteousness: for they shall be filled" (Matthew 5:6).

Among the citations which comprised the Lesson-Sermon was the following from the Bible: "Now faith is the substance of things hoped for, the evidence of things not seen. Through faith we understand that the worlds were framed by the word of God, so that things which are seen were not made of things which do appear" (Hebrews 11:1, 3).

The Lesson-Sermon also included the following passages from the Christian Science textbook, "Science and Health with Key to the Scriptures," by Mary Baker Eddy: "As God is substance and man is the divine image and likeness, man should wish for, and in reality has, only the substance of good, the substance of Spirit, not matter. The belief that man has any other substance, or mind, is not spiritual and breaks the First Commandment, Thou shalt have one God, one Mind" (p. 301).

BATTLES TAXES

MRS. FRANKLIN M. MILLER

Prominent Chicago clubwoman, Mrs. Miller heads Illinois women in national housewives' fight on hidden and other taxes that "increase living costs." She is Illinois member of the national committee of the National Consumers Tax Commission, a group of tax-makers warring on all taxes that "add to the burden of the consumer."

Illinois Families Pay \$9.26 Per Week In Taxes

Illinois' two million families pay an average of \$9.26 a week in taxes, according to a survey reported by the National Consumers Tax Commission.

The survey was made public by Mrs. Franklin M. Miller, of 1500 Lake Shore Drive, Chicago, the Illinois member of the Commission's national committee.

"The average income of families in this State is \$33.09 a week," Mrs. Miller stated. "When the tax collector, representing local, state and national governments, takes \$9.26 a week from these already restricted budgets, the family obviously must give up semi-luxuries, sometimes even necessities, to make ends meet."

Mrs. Miller said the report placed Illinois' estimated tax burden for the year at \$928,644,774, as compared with the total wages and salaries of \$3,320,000,000. She added:

"From any viewpoint it is wrong that a large share of this tremendous tax load should be paid by all consumers, usually without knowing it. More than 63 percent of all tax revenues are raised by hidden taxes, paid principally by the shopping housewife in increased costs of food, clothing, rent, medicine, and other necessities."

"Because she spends 85 percent of the nation's income, the housewife feels the burden most keenly. On her shoulders rests the responsibility of fighting hidden and other unnecessary taxes to preserve the American standard of living."

What Do We Expect of Modern Refrigeration?

"Keeping meats safely fresh, wholesome and appetizing is one, if not the most important jobs required of a modern refrigerator," would be the answer of nearly every housewife in the nation if asked the question—"What is to be expected of a mechanical refrigerator?" While many other assignments are visited upon this modern convenience appliance essentially its responsibility is to maintain a reliable and safe temperature at which food will not spoil.

Science and industry labored increasingly to perfect the electric refrigerator but it was not until recently when homemakers themselves were given a hand in its design and construction did the refrigerator attain the high degree of efficiency and convenience it has reached today. Proving Kitchen Hostesses, all over the world, took into their own kitchens Westinghouse refrigerators tried and tested them for a period of two months, using them as they ordinarily would, keeping careful records of their performance. One of the main duties of these hostesses was to suggest ways and means of improving the refrigerator. Almost universally they suggested adequate means of storing meats safely.

The new MEAT KEEPER of the Westinghouse refrigerator is the result of these suggestions. It is a scientifically designed meat storage compartment. Entirely enclosed and finished in porcelain enamel, with vents on the sides and a trivet on the bottom to permit the proper amount of air to circulate and to prevent the meat from drying out and becoming tough. The compartment is placed right under the freezer in the refrigerator cabinet and a constant low temperature of 40 degrees is easily maintained with the relative humidity of 85 degrees, both of which eliminate the growth of harmful bacteria—the cause of meat spoilage and discoloration. It holds ten pounds of meat and keeps it fresh and appetizing for days longer.

MOKENA

The Mokena Civic Club will hold their regular monthly meeting next Monday evening Sept. 19 in the school. The club has offered a prize for a design that would express the ideals of the club. Several symbols have been prepared and will be submitted for the consideration of the club's members at their next meeting Monday night.

Mr. and Mrs. Frank Hirsch Jr., who have been living in the Ed. Schmidt residence on Second street are planning to move to Chicago the first of next month.

The Robert Gilmore family, who are living in the Dorothy Mau residence are planning to move into the dwelling to be vacated soon by the Geo. Rinke family when they will move into their new home.

The Robert Geuther family residing in the Edwin Hirsch cottage expect to move into the Dorothy Mau place. The Harry Brandom family of Joliet will move into the Hirsch cottage vacated by the Geuthers.

Mrs. Harry Mall entertained a group of friends at bridge in her cottage on the Kankakee river, Tuesday afternoon.

Mr. and Mrs. Elmer Cooper left last Saturday for a motor trip to Iowa to visit with relatives.

A. C. Hall, John Ewalt and Morris Larson left by motor Monday morning for Northern Wisconsin on a fishing trip. The fishing location is 380 miles from here.

Another tavern has been added to Mokena the past week when a six month's license was issued by the Village Board to F. J. Robinson, located on the south end of the village in the former Green Gables place. The issuance of this license fills the quota of three taverns for Mokena. Under the ordinance no more licenses can be issued for taverns inside the village limits for the present time.

Miss Betty Bruder entertained a group of friends in her home Tuesday evening.

The Rock Island has had a new composition roof placed on the local depot which was very badly needed.

Frank Sizer has commenced building operations here on his new home on the south side of town.

Lloyd Warning has also started to build his new house across from the Mokena school.

Erwin McGovney has taken over the business of his father, the late Ona E. McGovney, and has also been appointed local representative of the Public Service Company.

John A. Martin left the forepart of this week for Montana on a business trip.

Mrs. Geo. Kraus who returned last week from Silver Cross hospital following a major operation, is recovering nicely.

Mrs. Nick Heiman returned Saturday from a week's visit with her sister at Fort Collins, Colo., who is ill.

Mrs. Tom Mifflin and daughter Ellen of Fort Douglas, Utah visited in the home of her aunt and uncle, Mr. and Mrs. Anton Benson and family over the week end as she was returning to her home after spending two months in the east.

Mrs. Albert Braun and Mrs. Anton Benson were judges at a Flower Show in Channahon Tuesday of the Community Woman's Club.

The Mokena Garden Club entered an exhibit in the Joliet Flower show Wednesday.

There will be a special meeting of the Mokena Parent-Teacher Association in the school Friday evening September 16 at 7:45 o'clock. All members are requested to be present as this is a very important meeting.

MARTI'S DAIRY, Mokena

"Fight For Peace" Says G. L. Dosland

A definite pledge to "fight for peace" was made by Goodwin L. Dosland, Republican candidate for Congress in the Third District, in a discussion of foreign relations and the danger of another world war.

"While the administration conducts our relations with other countries, only the Congress of the United States can declare war," Dosland pointed out, "and only the Congress can appropriate money to conduct a war, declared or undeclared."

"I pledge myself to vote against and make every effort to defeat a declaration of war, unless and until the homes of Americans in the United States are threatened by a foreign power. I will also oppose any action or expenditure to send American boys to fight on foreign soil."

"No foreign war can accomplish anything. The allies thought they won the last war, but now they are finding out that they lost it just as much as the Germans did."

"It is true that the United States was born out of the travail of the Revolutionary War, and was preserved by the Civil War. These wars were fought in defense of home and liberty, and Americans will defend themselves as bravely today. I do not believe, however, that it will be easy to persuade you or your sons to make the world safe for democracy or anything else."

"The members of Congress are your representatives. You have a right to pledge them to obey you. And if they break a pledge to keep you out of foreign wars, they should expect you to tar and feather them when they come home for the holidays."

MARLEY

MISS FRANCIS GILLETTE

Miss Ruth McClure of New Lenox spent several days this week in the Mervin Moore home.

Mr. and Mrs. Stanley Coe were dinner guests Sunday at the Ed. Marshall home.

Mr. and Mrs. Floyd Sixon of Colville, visited Tuesday and Wednesday at the home of Mr. and Mrs. Wright Woods.

Mrs. A. J. Cleveland spent several days this week in the home of her daughter Mrs. Ernest Eaton.

Mr. and Mrs. Robert Gillette and Bobbie visited Sunday at E. D. Gillette home.

Mr. and Mrs. A. Kohl visited in Blue Island Sunday at the George Hausser home. Mrs. Hausser is seriously ill in St. Francis hospital, following a major operation.

Miss Catherine Weeks, who has been ill for several weeks is improved.

Mr. Dan Laufer of Joliet called on friends in Marley Monday.

Mr. and Mrs. Clarence Rowley and Marilyn of Plainfield were Sunday dinner guests at the A. L. Sproat home.

The Gleaners held a district meeting Wednesday evening at 8:30 at the Colonial Ballroom, New Lenox. A program was presented by the Maple Street Arbor of Gleaners. Refreshments were served. Dancing was enjoyed after the program.

Dinner guests Sunday at the A. J. Cleveland home were Mr. and Mrs. Ernest Eaton of Joliet, Mr. and Mrs. Ike Cleveland of Orland Park, Mr. and Mrs. Mervin Moore, Ramona and Mr. Milton Loucks. The dinner was in honor of Mr. Cleveland's birthday.

Mr. and Mrs. H. Johansen and family of Chicago visited Sunday at the Chas. Bostrom home.

Next Sunday, Rev. Bernard Loomer of Chicago will be guest preacher at the Marley church.

HOMER

Mrs. Fred Kopleman

Mrs. Peter Reiter received word Wednesday that their grandson, Wayne Eisenbrandt, 7 year old son of Mr. and Mrs. Harlan Eisenbrandt had passed away in his home near Frankfort. Wayne had been sick for a long time but his death came as a sudden shock to his loved ones. He is survived by his parents, one sister Joy Mae and four grandparents. Funeral services were held Friday from the home to St. Peter's Evangelical church. Burial in Frankfort cemetery.

Joan and Jean Rowley of Chicago Heights are spending this week with their grandparents, Mr. and Mrs. Clarence G. Rowley.

Mrs. Emma Wese of Albion is spending a few weeks with her children Mrs. Chas. Jensen and Mrs. John West.

Sunday the family of Mrs. Bernice Frazer held a reunion at the home of her son James Frazer, 37 members were present from Evanston, Joliet, Lockport, Chicago Heights, Manhattan and Homer.

The West family enjoyed a reunion at Hopkins Park in DeKalb Sunday. Those present from Homer were Mr. and Mrs. Fred Blodgett, Mrs. Wallace Morrison, Mr. and Mrs. Chas. Jensen and daughter Charlene, Mr. and Mrs. John West and children and Mrs. Emma West.

Silo filling has started in earnest now and the men are busy getting their corn into the silos as rapidly as the rainy weather permits. Several are plowing also for winter wheat.

Mr. and Mrs. Merritt Cagwin and sons Elwyn, Willard and Ralph were dinner guests Sunday at the home of the formers parents, Mr. and Mrs. Harlow Cagwin.

Mrs. Wallace Morrison was the guest of her sister Mrs. Leonard Heusing at Fairmont over the week end.

The Ladies Missionary Society will meet the fourth Thursday in September. The meeting will be held in the church parlors with Mrs. Will Ross and Mrs. J. T. White as

hostesses. The day will be spent in completing articles and plans for their annual festival and supper to be held Thursday evening, Sept. 29. Mrs. Ira Anderson, president of the society has announced Mrs. Frank Rowley, Mrs. Ross White and Mrs. Frank Hartman, Sr. as the advertising committee.

Miss Vivian Holm has returned to her duties in Chicago after a two weeks vacation.

Miss Lucille Schwaab is spending a few weeks at the home of her uncle and aunt in Lemont.

Mrs. Grace Piggott and son Eugene spent the weekend with relatives in Chicago.

Reed Burch, Jr., who has been a patient at Silver Cross hospital the past three weeks returned to his home here Wednesday.

Eleanor Kopleman and Bernice White are attending the Lockport grade school this year.

The Womens community club will be entertained at the home of Mrs. Hal B. Reed on Friday Sept. 16.

Several from this vicinity are planning to attend the 3 act comedy "High Pressure Homer" presented by the C.I.C. players at the Willow Avenue church in Joliet September 14, 15 and 16.

Word comes from Chicago Heights that Mr. and Mrs. Elmer Rowley are the proud parents of a baby girl. This little one will be a playmate to Joan and Jean.

Mr. and Mrs. Irvin Volrath are the proud parents of a baby boy born September 5 at their home in Lemont. The name given is Harold Irving.

The meeting of the Pilgrim Fellowship group of the Aurora Association of Congregational churches, which was scheduled for this Sunday had to be postponed for two weeks and will be held on Sunday afternoon and evening September 25.

"PRINTING" to Order at Our PRINT SHOP

Bugle Calls

By Zeb Potter

A warehouse is made rat-proof. The owner of a dwelling takes precautions against rats. But have you ever heard of crime-proofing a rural area?

In the East a car manned by state police travels about instructing farmers, filling station owners, store proprietors, on how best to protect themselves from bandits.

We have had similar educational work done here in connection with preventing hold-ups of country banks. A man some years ago connected with the Iowa State bankers association lectured to business men and others on how Iowa cut down the raids from bank bandits. This of course was valuable, but it just pertained to banks.

The state police work in the East covers not only the banks but the man who has raised a flock of turkeys and ducks for market. The state police officer warns his against strangers visiting his premises who undoubtedly are getting the "lay of the land."

In Illinois, and particularly near Chicago where we live, it would be a great help to honest citizens earning their own livings if more of this crime prevention work was carried on.

GEORGE THOMSON
FRANKFORT, ILLINOIS

Hybrid Seed Corn Field Days

While the hybrid seed corn we planted is maturing in our fields we should be thinking about and exercising the opportunity (which will soon pass) of inspecting the hybrid seed fields from which our 1939 hybrid seed corn will come. There is no test or inspection of hybrid seed corn that equals the inspection of the parent plants growing in the field. Nor is there any way of inspection or certification that can give us any concept of the plant or soil environment that has such a marked influence on the growing qualities of the seed we plant. There is no substitute for our own eyesight and our own judgment. Such is not equalled by what somebody else may say or assert about the seed we buy, whether such assertions are by word of mouth or on lithographed certification blanks.

You can judge distance and know what constitutes isolation. Where barrier rows of pollinator corn are used for pollen protection of the seed lines, we can tell by comparison if these are the same as the pollinator and if the number of rows are sufficient. We can tell whether the seed line rows have been crowded with too many kernels in a hill (for high yield) or the plants enjoy room for best maturing conditions. We can by inspection of the maturing ears judge if the phosphorous, nitrogen balance has been properly controlled in order to produce the highest vitality and viability seed for our next year's planting.

When viewing hybrid seed corn growing in the field for our next year's planting we keep in mind that our great interest in the corn is not for the value of the substance that constitutes these corn kernels that we get but for their influence on the offspring which will be our next year corn bearing plants. It is the offspring that carries our interest, as distinguished from the value of the substance, that goes to make up the kernels of the corn we buy.

Hence, when viewing the conditions surrounding a hybrid seed field we are searching for and keeping uppermost in our minds those conditions that will have the greatest effect on the offspring. We want that high vitality of the seedling that has to overcome unfavorable soil or climatic conditions of our next growing year.

Some may argue that the offspring can bear more hardship if the parent has been subjected to it. With hybrid seed this is not true. In the development and selection of the inbreds from which we develop our hybrids we eliminate all those that can not stand hardship but once our inbreds are selected their evolution is over and their character fixed. When we mate and breed these inbreds we want favorable conditions during the maturing period for the greatest vitality of the seedling.

Let us take as an illustration two thoroughbred sister cows, being offspring from the same dam and sire; full sisters and blood line inheritances identical. Let us further consider that they have been bred to the same sire but each put under a different environment, one thrown in with a group of feeders with which it will have to contend for its feed and resting comforts. The other given the luxury of isolation, protection from competition for either space or food. You are offered the choice of either offspring. The blood inheritances are the same, just the prenatal environment differs. It is the offspring that you are interested in.

This illustration is identical with hybrid seed corn. The day of evolution is past in the mating of the inbreds. In the mating of the inbreds and the production of the seed we should afford during the maturing and maternal period the environment and food supply that will

make the offspring of the highest vitality. We can not judge environment of the seed we will plant next spring if we wait until the seed is in the bag before inspection. True if grown at a distance too great to bridge we can accept lurid sales pictures of how well the corn was grown but such does not take the place of our own observation.

Farmers living in Will County and vicinity have the opportunity of visiting the Thomson Top-Yield Pfister Hybrid Seed Fields in Frankfort township on Lincoln highway (U. S. 30) one-half mile west of U. S. 45, to check up on the character and environment of the maturing seed and to learn how these matters may be judged. This should be done, however, before the close of the present growing season, after which opportunity of checking seed field conditions for 1938 will pass.

The use of hybrid seed corn is becoming general and we want those who are to follow in our work to early become acquainted with its basic principles as well as its opportunities and advantages. Hence, we should take our youth to these seed fields in order that they may become acquainted and familiar with hybrid seed corn production conditions during this transitional period from open pollinated to hybrid and learn how to become able to best recognize and judge conditions that have a bearing on the worth of hybrid seed corn. If we want our children to become interested in our work, our industry, we should invite and encourage this interest every educational means possible and particularly take advantage of first hand inspections with the things themselves in their developing environments.

Don't pass the opportunity of taking your children to visit hybrid seed fields.

FRANKFORT

Mrs. Herbert Kohlhaagen

Friends of Leroy Bettenhausen, son of Mr. and Mrs. Wm. Bettenhausen will be glad to hear that he is improving rapidly in Silver Cross hospital following a severe injury to his face when he was kicked by a horse last Friday.

The Alumni of the Frankfort Public School is planning for an outdoor get-together for Sunday Oct. 2 in the Arthur Geuther's woods. All members including their families or friends are cordially invited and expected to be present. The purpose of the gathering is to have a social afternoon. The officers are planning the entertainment. Bring your basket filled with eats. Chicken will be served at supper, if you bring it.

Mr. and Mrs. Walter Pfaff, Evelyn Pfaff and Gilbert Knater are enjoying a motor trip thru the west.

Albert and Wesley Stammer, sons of Rev. and Mrs. Stammer of Wausau, Wis., visited here with friends a few days. Rev. Stammer was a former pastor of the Frankfort M. E. church.

The Frankfort band took part in the Music festival held on Richard's street field in Joliet Friday, September 9. A drum major was an added attraction. Many local music lovers enjoyed the entire evening.

Weather conditions caused a very poor attendance at the annual Schroeder Reunion held last Sunday in Art Geuther's woods. Nevertheless, those near by enjoyed a supper together hoping for a better one next year.

Mrs. Raymond Haelke is recovering following an operation in Silver Cross hospital.

Mrs. Adam Sippel is ill in her home.

Mr. Max Haass is improving after having an attack which caused a set back.

Mrs. Katie Dammann and her daughter and husband Mr. and Mrs. A. C. Naal and children, Albert and Nancy of Joliet returned from a western trip last week. They visited Mrs. Anna Kraus, the mother of Mrs. Dammann as well as her sister at Keenesburg, Colo and report a very nice tour.

The Clover Farm store picnic will be held Sunday afternoon Sept. 18 at Warnings grove. There will be games and amusements. Everybody is welcome.

The monthly business and social meeting of the Ladies Aid Society of the Frankfort Methodist church was held in the church parlors on

Morry's Tavern

MOKENA, ILLINOIS WE HANDLE THE FAMOUS PABST BEER

Thursday afternoon, Sept. 1, there being a very large attendance and the hostesses were Mrs. Geo. Andrew and Mrs. Lawrence Woodman.

Mrs. C. F. Schellhase who has been re-elected president for the seventh consecutive year presided at the meeting. The other officers elected are Mrs. O. B. Herschback, vice president, Mrs. Geo. Andrew, Sec., Mrs. Geo. Mitchell, Treasurer Mrs. Harry Tewes, Pianist.

The devotionals were led by the Pres. Mrs. C. F. Schellhase. The Misses Irene and Kathryn Heisner sang a duet beautifully.

The guest speaker for the afternoon was Mrs. Wm. Schellhase of Tinley Park, who took as her topic, "Take Time to be Holy". Mrs. Schellhase is a very pleasant and forceful speaker and impressed the group very much with her eloquent address. She has appeared at many gatherings and the Methodist Ladies Aid was very fortunate in securing her.

During the regular business routine the following committees were appointed to serve for the coming year.

"Executive"- Mrs. Geo. Mark, Mrs. Otto Heisner and Mrs. L. Jorenzen. "Devotionals"- Mrs. Paul Mark, Mrs. Henry Heisner and Mrs. Geo. Hasenjaeger. "Ways and Means"- Mrs. Frank Heisner, Mrs. Raymond Warning and Mrs. Walter Hedges.

"Social"- Mrs. Henry Ross, Mrs. Frankie Tinker, Mrs. Walter Carlson, Mrs. Chas. Mark and Mrs. Clarence Schroth.

"Membership"- Mrs. Harold Folkers, Mrs. Irvin Schellhase and Mrs. Clarence Warning.

"Sunshine"- Mrs. John Clark and Mrs. Frank Johnson.

The next meeting of the Ladies Aid will be held Thursday October 6 when Mrs. C. A. Sangmeister and Mrs. Jule Kretschmer will be hostesses.

CARD OF THANKS

We wish to express our most heartfelt thanks to our relatives, friends and neighbors for the kindness shown us during our sad bereavement in the death of our son and brother Wayne. We thank all for the beautiful floral pieces and use of automobiles.

MR. AND MRS. HARLAN EISENBRANDT AND DAUGHTER.

Committee chosen for next year are Mrs. Glen Batson and Mrs. Frank Pester.

At the Band Parents Association meeting held Monday night in the grade school auditorium, election of officers was as follows: Pres. Herbert Senning, Vice pres. Wm. Wood, Sec. Mrs. Flossie Corp, Treas. Geo. Bethel, Ways and means chairman Mrs. Rolland Cagwin. Business Manager Archie Corp.

Mr. and Mrs. Rufus Pugh of Harvey visited here Saturday night with Mr. and Mrs. Alfred Emily.

Mrs. Marie Penn and Mrs. Anne McIntyre spent Tuesday in Oak Park with Mrs. A. R. Dewey.

Mr. and Mrs. Daniel Newman of Blue Island visited Saturday with Mr. and Mrs. Wm. Moore.

Mr. and Mrs. Wm. Moore visited Sunday with Mr. and Mrs. Edward Scheweise in Dwight.

Constitution Day

By RAYMOND PITCAIRN

"Let us raise a standard to which the wise and honest can repair. The event is in the hand of God."

In these clear and reverent words, George Washington expressed the hopes of the men who wrote our Constitution during the historic summer of 1787.

Now, as America celebrates again the anniversary of the signing, we realize how faithfully the Founders adhered to Washington's high aspiration.

Now, as the nation considers anew the progress made under our Constitution, in growth, in prestige and in the freedom and well-being of our people, we realize how well those Founders earned the tribute.

For while the delegates to the Federal Constitutional Convention realized the difficulties ahead, their hopes were high. Throughout the deliberations there sounded constantly the clear note of insistence that here, in the United States, should be established a true government of, by and for the people. Their recorded words attest this determination.

"In free governments," pronounced that wise and venerable delegate, Benjamin Franklin, "the rulers are the servants and the people their superiors and sovereigns."

"The majority of the people, wherever found, ought in all questions to govern," declared James Wilson, of Pennsylvania. Authority, he added, "should flow from the legitimate source of all authority, the mind of the people at large."

"The genius of republican liberty seems to demand that all power should be derived from the people," said James Madison, of Virginia.

Constitution Day serves as a reminder of these principles, on which our nation was founded. Under the great Charter it honors, We the People are assured both liberty and power. And through every generation the responsibility rests on us to hold high that standard of liberty which, 151 years ago, George Washington urged and the Founders raised at historic Independence Hall.

THE BUNGLING HUNTER EXPLAINS

Women's Clubs To Meet Sept. 20

"Conservation chairmen of the Third Congressional District, Illinois Federation of Women's Clubs, will spend the day of Tuesday, September 20th, with the district chairman of Conservation Mrs. George B. Ward, 123rd street, Palos Park, Ill.

The group will arrive at Brookwood, the home of Mrs. Ward, at twelve-thirty for luncheon. Following luncheon, plans for the year's work of this department will be discussed.

A tour has been planned to the forest preserve in which the White Pine reforestation project which constitutes approximately fifteen years growth, will be the main feature.

Guests of honor are Mrs. E. E. Byrum, Warrenville, Illinois, state conservation chairman; Mrs. Thos. Gifford, 9547 Longwood Drive, district president; and Mrs. Arthur H. Swett, 10560 Longwood Drive, past district president.

Mrs. Ward has been chosen chairman of the Palos Park Pioneer in Review, which is scheduled for Oct. 13th, under the auspices of the Palos Park Woman's Club. This event will be held around the oldest log cabin in Palos Park, in the forest preserve.

Club women of the district will pack their lunch and prepare to spend the day in this quaint atmosphere. A program will be provided and the chairman and her committee will be dressed in costume of the pioneer."

Raceway Park New \$75,000 Sport Plant Opens September 17

Raceway Park, a complete sports plant, opens to the public Saturday night, September 17, at 129th and Ashland avenue, with an 8 race mid-gt auto racing program with more

Leading mid-gt auto drivers of the midwest will compete in the opening events Saturday night, Sept. 17, at Raceway Park, the new \$75,000 complete sport plant at 129th street, (Vermont) and Ashland Ave., Belt Route 54 at the south limits of (route 49) and Cook County's Outer Chicago and just east of Blue Island, Ill.

The grandstand and track are

than 30 of the leading drivers of the midwest competing Raceway, which later will also feature boxing matches and football and polo games, will have also free parking facilities for

completed and work on the administration and other buildings is being rushed. The plant covers 10½ acres in which plenty of room has been left for a free parking space for 3000 automobiles.

Ed. Rippe, superintendent, has arranged a nine event opening card with such drivers as Jimmy Snyder, Emil Andres, Myron Fohr, Harry MacQuinn, Bob Muhle, Ted Tetter-

5,000 autos.

Its track, the first official quarter mile track built especially for mid-gt auto racing, has already been pronounced by Jimmy Snyder and Emil

ton, and Tony Willman participating along with 25 other entries.

Already Snyder and Andres have passed their opinion that the new quarter mile oval, the newest in the country to be built especially for mid-gt auto racing, is the fastest mid-gt track in the middle west.

When the plant is completed in all its details there will be a dance pavilion, dining hall, and cocktail

Andres as one of the fastest ovals in the country.

lounge. Besides the mid-gt track, football, polo and boxing will be introduced, says Pres. Harry Malone of Harvey.

In fact Mr. Malone said, "This plant is fully equipped for all outdoor sports and it will be thrown open to the public for a week or two kinds, of interest to the entire Calumet area of the Chicago district and of Northern Indiana."

ORLAND PARK

Mrs. Ray Brennan, wife of Judge Ray Brennan, underwent a major operation for the removal of a tumor in the Silver Cross hospital in Joliet Monday morning. Dr. Schreffler of Joliet and Dr. S. S. Leavitt, the latter of Orland Park performed the operation. Mrs. Brennan is reported to be getting along very nicely.

The Altar and Rosary Society of the St. Michael church will hold a card party at the church parlors this Saturday evening. A nominal charge will be made.

Mrs. James Parker who has been quite ill is somewhat improved.

Mrs. Phillip Steffen Sr. had quite a scare Sunday night when she saw two strange men prowling about her place. She telephoned to her neighbor, S. S. Knox, but upon investigation no one could be found.

The village board at their meeting Monday night discussed at length the matter of paving Union street from the gas tax funds due the village. Nothing definite has been announced as to when the contract will be let or bids advertised for.

The Orland Park Legion Post met Tuesday night.

A large number of white herrons have been seen at the Orland Lake the past week.

The Christ Lutheran church school opened Monday morning with an enrollment of 18 students.

A miscellaneous shower was held

in honor of Vera Wattle at Creer hall, Wednesday evening, Aug. 31st. The hostesses for the evening were Mrs. Laura Heald and Mrs. Gladys Kesser assisted by Mrs. Bessie Uthe, Mrs. Annie Uthe, Mrs. Hilda Cox, Mrs. Creer, Miss Lavin Kay, and Mrs. Rose Kay.

The hall was beautifully decorated with bouquets of goldenrods, the color scheme being carried out in yellow and white.

A very exciting game of aeroplane bunco was played, and prizes were won by Mrs. Hannah Dueh, Mrs. Rose Kay, and Miss Marie Uthe, who presented them to the bride-to-be.

After an initiation of a shower of rice, the bride-to-be opened the array of gifts arranged in the center of the room. She received beautiful and useful gifts of linen, glassware, kitchen utensils, and odd dishes.

The guests then partook of a delicious luncheon, to which many of the husbands also attended.

Those present were: Mesdames Laura Heald, Gladys Kesser, Bessie Uthe, Annie Uthe, Oly Uthe, Clara Uthe, Rose Kay, Florence Kay, Ruth Ulrich, Emma Burkhardt, Alfreda Burkhardt, Hannah Burkhardt, Hannah Dueh, Mary Kramer, Jessie Creer, Gussie Hallihan, Anna Barger Mima, May Quigley, Hilda Cox, Margaret Welter, Anna Wattle, Louise Barger, Harriet Reiner, Mary March, Misses Lavin Kay, Lylas Kay, Marjorie Anne Kesser, Nancy Lee Uthe, Marie Uthe, Ruby Uthe, Lavin Uthe, Geraldine Uthe, Lois Wattle, Adelaide Lockhart, Vera Wattle.

Those who sent gifts but were unable to be present, were: Mrs. Lola Uthe, Mrs. Katie Kruspe, Mrs. Ida Humphrey, Mrs. Luella Schussler, Mrs. Edgar Cooper, Miss Mildred Uthe.

P.T.A. MEETS AT ORLAND

The Parent-Teachers Association of the Orland Park school held its first meeting of the 1938-39 year on Thursday, Sept. 8th. The new president Mrs. Lawrence Uthe, presided. Other officers for the new year are vice president Mrs. George Cox; secretary, Mrs. Ralph Town; treasurer, Mrs. Howard Hewson; ways and means chairman, Mrs. W. MacAleer; program chairman, Mrs. S. S. Knox; membership chairman, Mrs. G. Hallinan; publicity chairman, Mrs. C. E. Maddox; hospitality chairman and welfare chairman still have to be chosen.

The business session was followed

by a talk by Mr. Linden, principal, who explained the advantages of the third high school year at Orland Park. In the first place, the experiment is to cost little or nothing additional, inasmuch as the course is a continuation of the first two years and new equipment would be necessary anyway and Orland was to be allowed more money as its allotment from the county. Already there are 22 pupils in the first year; 15 in the second; and 14 in the 3rd. Completing the 3 years, a pupil will receive 15 units of credit, so that, as only 1 are required for graduation, it will be possible to finish in one-half a year more.

Mr. Linden pointed out that the objects to strive for this year would be to create a desire to attend school, thereby creating a certain pride in the building and work of for the pupils having earned by his and dishonesty. These lead to the second object, a feeling of success for the pupil having earned by his work; and for the faculty and board in having taught and procured by their work. Those automatically lead to the third object — that of friendliness between pupils, professors and Board.

By providing a third year, those who might not otherwise be able to go elsewhere are not deprived of the extra year. The chances for games are better and larger groups with similar interests are available with 50 pupils against 28 or 30 of other years. It is possible to teach more subjects by having more pupils. So a larger faculty is required. The association desires that every parent and everyone interested in the welfare of the school become a member and help to give our school children all the benefits we possibly can.

The next regular meeting will be held October 13th. The business session is always followed by a social hour. You are cordially invited to join us.

LEGION AUXILIARY MEETS

The regular meeting of Orland Park Unit of the Legion Auxiliary met in Legion hall, Friday, Sept. 9, 1938. Opening ceremonies and reading of minutes were followed by committee reports. The by-laws are ready for printing. It was voted to sponsor a Girl Scout troop in Orland Park, under the leadership of Mrs. David Krueger with a committee of five from the Auxiliary to assist. Announcements and invitations were read. The meeting adjourned until October. Coffee and cakes and a door prize rounded out the evening.

CARD OF THANKS

We thank the Orland Fire Department for their prompt response to call when the house on our farm was on fire September 8th. We also thank our friends and neighbors for their kind help at that time.

THE WILLIAM TILSY FAMILY.

PALOS PARK

Builders Tee, golf club, held their fourth all day outing at the Oak Hills golf club last week. About 95 members played at the tournament. Dinner was served at 6:30 p.m.

Blue Island Golf Association held a meeting at the Oak Hills golf club last Friday evening.

Miss Betty Parks has returned to Grand Rapids, Mich., to finish up her school work.

Plans are being completed to build another section on the Palos school house, which is located at 119th st. and 88th ave.

Sympathy is extended to the Baker family for the death of their oldest daughter, Grace who passed away recently. Funeral services were held at the Christian Reform church in Evergreen Park.

Patricia Saunders entertained the

LINCOLN ESTATES

Mrs. Pearl Whitney

Mrs. Gill visited her sister Mrs. Maloney last Wednesday in Chicago.

The Kluth family spent Labor Day in Wisconsin with relatives.

Mr. and Mrs. James Weddle of Chicago spent Sunday with his brother, G. C. Weddle.

Mr. and Mrs. Arquette were guests in the Gill home Sunday.

Mrs. Floyd Slagle and family have moved to Joliet for another school year.

Mr. and Mrs. Cochran, parents of Mrs. C. Griswold are moving into the Slagle home.

Mrs. Johnson and son Herbert are moving into the Lewis Wilson cottage.

Geo. Gift and family have moved to Chicago.

Raymond Murray writes from Battle Creek, Mich., that his school which he is attending, is O. K.

Mrs. A. C. Becker has been visiting with relatives and friends in Southern Illinois the past week.

Mr. and Mrs. Albert Smid and son of Steger, Mr. and Mrs. L. Loeftgren and Mrs. C. W. Smith of Chicago were guests of Mrs. Pearl Whitney recently.

Mr. and Mrs. Jerald McLean and children spent Saturday in Gary, Indiana.

Dr. J. Garofolo, wife and daughter spent the weekend with Mrs. Garofolo's mother, Mrs. G. C. Weddle.

Willard Eberhard has taken over the News-Bulletin paper route, formerly handled by Bob Fisher who is moving to Ashland, Virginia.

Mokena's Champion Travelers

Above picture shows Mr. and Mrs. Don C. Hall of Mokena on a hitchhiking trip. They have hitchhiked over 15,000 miles in the last two and a half years.

Gibson City To Sponsor A Big Fall Festival

The Gibson Chamber of Commerce is sponsoring a Fall Festival in Gibson City, September 21, 22, 23 and 24th. This Festival will have the Tiley Amusement Co., with their seven major rides; six shows etc. In addition they will have several good free acts, farm exhibits, contests, bands and parades.

A big dance will be held on all four nights.

Dick Shelton and his band will play Wednesday and Thursday evenings. He was the guest band at the Aragon and Trianon this summer. Carl "Deacon" Moore will play Friday night. This is his only appearance in Illinois and opens at the Village Barn in New York City October 1st. Al. Sky will play Saturday night. He is direct from Coconut Grove, Minneapolis.

This is the first Festival Gibson City has had in thirteen years and they are looking forward to a grand success of the affair.

FRANKFORT

The social room of the Evangelical and Reformed Church was the scene of an interesting party Wednesday evening when the members of the Cradle Roll with their mothers and grandmothers gathered, there.

A short program was given and Rev. Gerhold gave an interesting talk stating the purpose of the meeting.

The room was decorated with colored balloons hanging from the lights. Each child received a favor and a balloon. The guests were 27 cradle roll members and the Sunday school pupils of Mrs. Glenna Folker's class; 14 mothers and 25 grandmothers.

A luncheon was served at attractively decorated tables with flowers and favors.

Mrs. Fred Heusner is the Cradle Roll superintendent. She was assisted by Mrs. Glenn Folker, who both are appreciative of the co-operation which they received in this party. All present are looking forward to another party next year.

The buffet set offered by Mrs. Dorothy Tyler of Frankfort was awarded last Saturday to Mrs. Geo. Hacker of Mokena.

Palos Juniors in her home last Friday evening. Plans were discussed for a barn dance show to be given soon.

The Palos Park Boy Scouts, Troop 699 held their first Court of Review Wednesday evening. There are six second class and one first class Scouts.

Wheat Insurance Payment Due Only On Actual Acreage

Will County farmers who have applied for wheat crop insurance on their 1939 crop and who now plan to seed a smaller acreage may pay for crop insurance on the basis of the actual acreage to be planted rather than on the acreage originally indicated in their applications.

An announcement to this effect has been made by Byron Gaskill, Chairman of the Will county agricultural conservation committee.

A large number of growers in Will county have revised downward their intended plantings of wheat since the date they applied for crop insurance, Mr. Gaskill said. These growers have received or will receive notice of premiums due on the original acreage they specified. However, the county office can execute a rider to their premium notice which makes it possible to pay premiums only on the actual acreage to be seeded.

Even though the final date of payment specified in the premium notice has passed, the county office can accept premiums on revised acreage.

"If the farmer pays his premium in wheat, the county office can simply adjust the number of bushels that are due to the new acreage figure," Mr. Gaskill said. "If the premium is paid in cash equivalent this too will be adjusted according to the new acreage and any changes in the price of wheat."

Where the price of wheat has advanced since the expiration of the premium notice, the county office will compute the approximate amount of the revised premium on this basis. Where the price has declined, the premium can be paid on the basis of the revised acreage at the original price in the premium, and the branch office will adjust the payment to the new price, refunding any excess premium to the farmer or depositing it on 1940 premiums, according to the wishes of the farmer.

Wheat crop insurance on the 1939 crop starts as soon as the premium is paid and the premium must be paid before seeding. When the premium is paid the policy is in effect from planting to harvest.

NATIONAL AFFAIRS

Reviewed by
CARTER FIELD

TVA investigators find laws sometimes work in curious ways . . . Surprising use of federal investigators in examining witnesses in what is really a row between two Chattanooga newspapers . . . Senator Carter Glass and Secretary Ickes exchange compliments.

WASHINGTON.—Laws sometimes work in curious ways, as the congressional committee investigating the Tennessee Valley authority is discovering. The committee spent days going into a referendum held in Chattanooga over the question of whether the city would issue \$8,000,000 of bonds for the purpose of constructing an electric distribution system duplicating the one now owned in that city by private power interests.

Most of the testimony was over the fight waged on that bond issue, though some of it was on later attempts to force a vote on a city ordinance the effect of which would be to forbid such duplication.

It developed that a so-called citizens and taxpayers committee spent nearly \$24,000 fighting the bond issue, but was defeated. The chief object of the committee counsel, Francis Biddle of Philadelphia, was to show that this citizens' movement was financed by the power interests, and that its campaign was one of misrepresentation.

Now comes the curious part. Under the Tennessee law the local company, which was in danger of extinction if the referendum went for the bond issue, could not spend one cent to combat the public ownership advocates—even for newspaper advertising to tell its story. But it is perfectly legal, under the Tennessee law, for a corporation outside the state to send money into Tennessee to fight for the local company's interests.

So the Commonwealth & Southern company of which Wendell L. Willkie is head, furnished \$20,000 of the money used by this so-called citizens and taxpayers committee. Its interest was that it owned more than 90 per cent of the common stock, and a good deal of the preferred stock, of the company which would be badly hurt if the referendum went against it.

Which would seem to clear up another reason why the New Deal is opposed to holding companies.

Law Injects Another Curious Phase in Battle

Another curious phase, to disinterested outsiders, which law injected in this battle, is this. Under the law and its own regulations, the PWA, headed by Harold L. Ickes, is permitted to make a free gift of 45 per cent of the total cost of any project, and to loan the remaining 55 per cent of the cost at a low rate of interest, to any municipality wishing to construct its own electric distribution system.

President Roosevelt has frequently contended that where a local community decides it wishes to be served by a municipal system the local authorities should first seek to buy out the existing utility system rather than resort to the economic waste of duplication.

In the last session of congress an attempt was made to attach an amendment to the relief bill providing that no money should be provided for constructing public ownership electric systems in communities now served by private utilities. This movement attained so much strength in the senate that President Roosevelt sent for Sen. Alben W. Barkley, Democratic leader of the upper house.

Barkley later promised on the floor of the senate that no such loans would be made to communities where there already existed privately owned electric systems unless the ownership of the private utility refused a reasonable offer for the purchase of its property.

But—the PWA does not make loans for the purchase of existing property.

Investigations Often Turn Into Witch Hunt

The danger of any congressional investigation is always that it is likely to turn into a witch hunt. Especially if the ordinary fishing expedition fails to produce headlines for the conductors.

Consider for a moment the actual purposes of the TVA investigation, involving the expenditure of more than half a billion dollars of the taxpayers' money, involving the yardstick question, which congress and most of the public thought was to determine scientifically what electric rates all over the country ought to be—what would be fair, what would be excessive—thus proving not only a guide but possibly a club for the commissions regulating public utilities in the 48 states. In-

cidentally, most of these commissions, it is charged by public ownership advocates with considerable logic and no satisfactory answer, have failed to function satisfactorily.

Now consider one of the latest activities of the committee, which caused its surprise visit to Chattanooga. One was a row over whether the power company interests did not resort to misrepresentation, and actually spend \$24,000 in fighting a public ownership referendum in Chattanooga.

Two Chattanooga Papers Engage in Bitter Row

But even more surprising is the use of federal investigators and the examining of witnesses in what is really a bitter row between the two afternoon newspapers in Chattanooga.

The older of these papers, the Chattanooga News, is headed by George Fort Milton, who recently spent many months in Washington on the payroll of the state department at a pay rate of \$8,000 a year as some sort of assistant.

Milton has always been interested in national politics. He was a hard hitting lieutenant of William G. McAdoo during the famous convention fight at Madison Square Garden when the religious issue was predominant. It was generally assumed in Washington, when he came to the state department, that his real job was to be a sort of press agent for the presidential ambitions of Cordell Hull, though this turned out to be a hope among the admirers of Mr. Hull—who hoped this signified the secretary of state was really going after the nomination—rather than an actuality.

So the News communicated to Francis Biddle, counsel for the TVA committee, these facts, plus the fact that the purchaser, Harold Humphreys, had promoted two separate attempts to get referenda in Chattanooga on an ordinance which would forbid duplication of existing electric facilities.

Whereupon the witch hunt was on.

Senator Glass and Ickes Exchange Compliments

When Sen. Carter Glass denounced PWA Administrator Harold L. Ickes the other day as a "confirmed blackguard," after "Honest Harold" had attacked the Virginia senator as a "hypocrite" who "bites the hand that feeds it," there was ground for thinking that perhaps the Old Dominion is behind its senator.

Which is passing strange, not because Virginia admires Senator Glass—it has been proving that these many years—but because it had been thought that the New Deal was very strong in Virginia. In fact, a poll taken two years ago by the Richmond Times Dispatch showed the state to be overwhelmingly for President Roosevelt.

But it would appear that the purge has changed things somewhat down below the Potomac. For instance, in a speech a few days ago in Richmond, the historic capital of the state, Rep. Dave E. Satterfield lashed away at the attempt of the federal administration to intervene in state primaries. That way, he insisted, lay dictatorships.

Now this was not a speech delivered in the heat of a primary campaign by a candidate fearful of what might happen to him. It was delivered more than two weeks after the Virginia primary.

On the same day on which his speech was printed the Roanoke Times over in the sixth congressional district (Mr. Satterfield's district is the third) published a very temperate, but also very critical editorial of the purge idea and of its application in the present campaign.

President's Attitude May Cause Loss of Prestige

A few days before that the Norfolk Ledger-Dispatch, down at the far eastern end of the state, published a powerful editorial which is being reprinted throughout Virginia, saying that it was because of Woodrow Wilson's unwillingness to tolerate his opponents to the point of including their foremost leaders in his peace delegation

that he lost the peace and Mr. Roosevelt's unwillingness, in Georgia and elsewhere, to tolerate his opponents is exposing him to the danger of a serious loss of prestige.

"Mr. Roosevelt," said the Roanoke Times, "is like Wilson in that he is eternally convinced of his own rightness and, because he feels so strongly the rectitude of his motives, is impatient of any opposition. It is a dangerous quality, albeit a not uncommon one in men who occupy positions of great power, and it may easily, and often does, lead to ultimate disaster."

Some New Dealers are wondering just why Mr. Ickes, to make some trifling point in a speech in far-off Tacoma, should call Virginia's grand old man a "hypocrite." Especially as Mr. Ickes has now had six years in Washington to watch Mr. Glass, and might have known that nothing was so calculated to bring support to Sen. Millard E. Tydings, over the river in Maryland, as to have the administration put in the position of unfairly attacking Carter Glass. For Glass is as much admired in Maryland as in Virginia. Anything about Glass is news in Maryland.

Lesson for September 18

JONATHAN: COURAGEOUS FRIENDSHIP

LESSON TEXT—I Samuel 20:4-17.
GOLDEN TEXT—A friend loveth at all times.—Proverbs 17:17.
PRIMARY TOPIC—Noble Prince Jonathan.
JUNIOR TOPIC—Noble Prince Jonathan.
INTERMEDIATE AND SENIOR TOPIC—The Adventure of Friendship.
YOUNG PEOPLE AND ADULT TOPIC—The Cost of Being a Friend.

Without question, the most precious possession any man or woman has (apart from his fellowship with God if he is a Christian, and the love of his own family) is friendship. It is the flower that blooms by the side of the rugged pathway of life. Like many flowers, some friendships need to be cultivated and encouraged.

It has been said that the love of a woman for another woman is a beautiful thing, the love of a man for a woman an even more devoted and precious thing, but that the bond of love between man and man surpasses all in its strength and glory. Some might question such a statement, and yet it is true that between man and man there is the possibility of the highest type of friendship. David and Jonathan stand at the head of an inspiring list of men who loved each other with their whole souls.

The lesson for today calls for a careful reading of the incidents in the life of Jonathan and David recorded in I Samuel, chapters 14, 18, 19, and 20, as well as the first chapter of II Samuel. It is a story which will richly reward a careful reading. Considering the printed portion in the light of this background we note six things that characterized this great friendship.

I. Cultivated (v. 4).
Friendships must be "kept in repair." Foolish and almost wicked is that man who by boorishness of fending his fellowmen, or by neglecting the thoughtful words and acts that cultivate friendship, drives men away from him. "He that hath friends must show himself friendly" (Prov. 18:24). Consider the admonition of our Lord in Luke 16:8, where he urges the righteous use of even our worldly possessions to cultivate eternal friendships. Read what Jonathan did in I Sam. 18:3-5, only one of his many loving and thoughtful acts.

II. Courteous (v. 8).
David asked that Jonathan deal kindly with him, and the entire story reveals that he did just that, always. More friendships are wrecked on the rocks of little discourtesies than in almost any other way.

We live in an age which affects an outward veneer of culture but which is at heart often thoughtless and unkind. Let Christian men and women be courteous. They should be as followers of the gentle Jesus, and it will bring them countless friends.

III. Candid (v. 9).
Friendships that last must be built on absolute candor, not the kind that delights in telling an unpleasant truth, but one which speaks the truth in love. Jonathan told David the truth.

IV. Courageous (vv. 12, 13).
Jonathan was such a faithful son that when the time of parting came he stayed with his wicked father rather than go with David, whom he loved. But he was true to David even though he knew it would incur the wrath of his father if that friendship became known.

Things that cost us nothing are usually "worth it." Real friendship calls for sacrifice, standing by in the night hours, sharing burdens, loyal even though others may condemn us for it.

V. Covenant Keeping (vv. 16, 17).
Covenants entered into by solemn treaties in our time are soon discarded as "scraps of paper." People make promises to one another that they never intend to fulfill. Jonathan and David made a covenant and kept it. True friends do not violate their loving agreements.

This matter of trickery and falsehood in life and business is one that deeply troubles the writer of these notes. He sees unmistakable evidence that this perverse spirit has come into the precincts of the church itself. We should have a revival of honesty in office, home, state, and church.

VI. Complete (v. 17).
"He loved him as he loved his own soul"—such a friend was Jonathan. His devotion to David had no qualifying "strings" on it. He was not seeking something for himself. The closest he came to that was to bring his children into the covenant with David (v. 15), and who could question the propriety of such devotion between true friends? He saw that David was to supplant Saul as king, and in the face of his own interest as Saul's son, he put David forward.

Friendship is akin to our relationship to God in that it calls for a complete giving of ourselves, if we are to be true friends. This does not mean that individuality is lost, or special interests and abilities destroyed, but it does mean a whole-souled desire for our friend's welfare, and a complete devotion of our all to his good.

The SALLY SMILE

—By—
D. J. Walsh
Copyright
WNU Service

MRS. PINNEY had called to see Miss Bowman, and the two women were in close conversation in Miss Bowman's private office. Miss Bowman was chief executive of the governing board of the hospital, and Mrs. Pinney was a director.

"Well, it simply has come to this," Miss Bowman said, wiping her eyeglasses nervously, "we'll have to close the hospital, if we can't get something to run it on. The citizens have done nobly—nobly, but they can't do everything. It remains for some moneyed person to come to the front now."

"Like Mrs. Chichester?" suggested Mrs. Pinney. Mrs. Pinney was a small, eager woman, who looked rather worn from the long-continued struggle of keeping the precious little hospital going on next to nothing a year.

"Yes! Mrs. Chichester. She is our richest citizen. She could give \$50,000 and never feel it."

"But would she?"
"There's the question. I'm afraid she wouldn't. I've approached her unsuccessfully."

"So have I," moaned Mrs. Pinney. "Well, you can't force a person to give up her money, that's certain. I suppose it's hopeless."

"I don't know about that. I've been thinking I'd send Sally Drew to her and see what good that would do."

"Sally Drew!" Mrs. Pinney jumped. "She's the very one. I'll see her this afternoon."

Sally Drew was a tiny woman with hair like snowy wool and a pale pointed little face. Her eyes were wonderful, so bright, so black, so alive. They danced in her face. But her smile was more wonderful than her eyes.

The smile came now at sight of Mrs. Pinney.

"Julia!" she cried. "Come right in."

In Sally's small living room, so old-fashioned, so cozy, and withal so well suited to Sally herself, Julia Pinney told her story.

"Well, what do you want me to do?" Sally asked.

"I want you to go to Helen Chichester and get her to give us \$5,000. That will keep the hospital running for one year. After that—but we'll hope."

Sally's smile vanished. She was silent an instant.

"I'll go, of course," she said quietly.

Mrs. Pinney arose.

"Sally, you're a dear. If any one can do it you can. You are our last resort."

At 9, just as Mrs. Pinney was ready to fly to pieces with suspense, Sally walked in. The Sally smile was bright indeed.

"I couldn't get away sooner. Helen wouldn't let me come. You

A Costly Road

The Pulaski skyway is probably the most expensive road in the world for its length. The part of it that is raised is three miles long and cost \$21,000,000. The approaches cost an additional \$19,000,000. This roadway is 50 feet in width and can easily accommodate five lanes of traffic. It is estimated that 20,000,000 motor vehicles use it annually. It passes over both the Hackensack and the Passaic rivers and the New Jersey Meadows.

see, we haven't spoken before in thirty years—"

"What?" gasped Mrs. Pinney. "Thirty years," nodded Sally. "I did hate to go. But after I got there it was all right. Here's your money." She drew a check from her handbag and gave it to Julia. "Fifty thousand dollars!" Mrs. Pinney could just articulate. "But we hoped your smile would do it."

"It did," Sally grew grave. "Thirty years ago Helen got the man I wanted. But no one ever knew it except her and me, for the day she was married I pinned on my smile and I've worn it ever since." She paused reflectively. "She says she was puzzled for thirty years over my smile. We made a fair exchange. I told her how I got it and she gave me \$50,000 for my secret."

Herbert Chichester had only lived five years, but he had lived long enough to spoil the lives of two women. His wife had grown selfish and sore, but the woman she had won him from had "pinned on a smile" that had brightened a whole community.

Tires for Trucks and Buses at Proportionately Low Prices

● When it is low cost combined with high quality it's always Firestone. Car owners everywhere are buying Firestone Convoy Tires for safe, sure economical service because they want to get a high quality tire at an unusually low price. Only Firestone gives you all of these patented and exclusive extra value features:

1. Gum-Dipping, the Firestone patented process which protects against blowouts.
2. Two extra layers of Gum-Dipped cords under the tread, a patented construction which protects against punctures.
3. Scientifically designed tread which protects against skidding and gives long mileage.

See your nearby Firestone Dealer or Firestone Auto Supply & Service Store and equip your car with Firestone Convoy Tires—the safest tire that money can buy at these low prices.

TRUCK OWNERS SAVE MONEY TOO!

The Firestone Convoy Truck Tire is made in all sizes for trucks and buses. It brings you high quality at low cost. Truck owners who have already used this tire are referring to it as the truck tire sensation of 1938. Cut your cost per ton mile and at the same time keep your tire investment low — equip your truck today with a set of Firestone Convoy Truck Tires.

CHANGE OVER TO A Firestone BATTERY

Here is a battery that will take you through the hardest winter without trouble. Built with patented allrubber separators and interlocking grids, it assures quick starting, longer life, greater dependability. Ask for our special "Changeover Price."

Firestone AUTO RADIOS

With 6 all-metal tubes, 8-inch dynamic speaker sound diffusion system, represents highest quality.

Firestone SPARK PLUGS

Save gasoline, secure quicker starting and improve motor performance by putting in a new set of Firestone Spark Plugs today.

LIFETIME GUARANTEE

Every tire of our manufacture, bearing our name and serial number, is guaranteed by us to be free from defects in workmanship and material, without limit as to time or mileage, and to give satisfactory service under normal operating conditions. If our examination shows that any tire has failed under the terms of this guarantee, we will either repair the tire or make an allowance on the purchase of a new tire.

FIGHTING 'FORTYPHOBIA'

Industry Rejects the Man Over 40, Giving America a New Worry; Science Proves There's No Reason for Such Discrimination

By JOSEPH W. LaBINE

Last January, President Roosevelt's unemployment census showed between 8,000,000 and 11,000,000 Americans were out of work. Since then, recession has boosted the figure. The tragedy of unemployment has been one thing, but the type of people hit by this ogre is an even greater disaster.

What hurts — and what the best minds of America are still unable to understand—is the predominance of middle-aged people on relief, the great multitude of competent men and women who have been unable to find jobs simply because they're "over 40."

You can see it any day in the want ads under "Help Wanted":

Plumber, experienced at fittings and alterations. Only men in young thirties need apply. Z-432. Gazette Office.

It's a case of plain arithmetic that young men can weather unemployment better than their elders, having fewer mouths to feed, fewer feet to shod. But a cold-blooded employer, looking only at efficiency and economy, compares the thick-thatched head with the bald pate and takes the former. Young men learn quicker, adapt themselves better, turn out superior work. At least, it's the argument.

Tables Are Turned.

The man over 40 is a problem of the machine age. Once, in the days of guild supremacy, the situation was reversed. Every youth was an apprentice whose hands were thought unskilled, whose talents were shaped under the guidance of a wizened elder. Moreover, in that simple world it was satisfaction enough that all hands were busy; the age of specialization had not arrived.

If you should look in the department of labor files at Washington, the case of John Brown would furnish an example of today's dilemma. Brown is 45, married and has two children. His wage-earning days started after grammar school because his widowed mother needed help. At 15 he found work in a local factory, took time out to serve overseas in the World War, then worked steadily until the depression days of 1932. Meanwhile, he had been married, had bought himself a home, took out insurance and built up a small savings account.

But from 1932 to 1937, John Brown could find no work. His savings disappeared, he lost his insurance and his house was mortgaged. When the factory finally re-opened, the boss refused to give him a job; said he needed younger men. In consequence John Brown doesn't know where to turn. His life's work has been specialized and he'd have to start as an apprentice in another trade. With many, many years of usefulness ahead of him, this man has reached an age when industry turns him out. Why?

Industry's Answer.

As their first reason, employers say he is a "bad physical risk," that he's entering the period in life when degenerative diseases will lower his efficiency. But employers are generalizing here; a man's susceptibility to disease almost always depends on the type of work he does. Highest death rates are found among unskilled laborers. Statistics show that frequency of sickness decreases with advancing age, though older people have more severe illnesses. The only fair course is to let a physician determine whether the man over 40 is a "bad physical risk."

The employer's second reason is "bad accident risk," notwithstanding repeated surveys which show the man over 40 is more careful than younger workers. Caution is a natural by-product of age. The

Young men are forging the new pattern of American society, for industry now seeks youth to the detriment of men over 40.—U. S. Dept. of Interior photo.

only grounds for the "bad accident risk" argument is that older men are slower in recovering from injuries.

Next, employers speak of "decreased productivity." There is no denying that efficiency declines with age, but not so fast as to strike a death blow to the man of 40. What few tests are available show that exceptional workers of 40, 50—and even 60—are just as efficient as younger men. The simple answer is that proficiency's decline is gradual; it does not plummet down after a man reaches 40.

The most valid argument of all is the last, that a middle-aged man is "too slow and inadaptible to changing conditions." In an age like the present, where industry has been revolutionized in the past two decades, this claim may hold water. Modern machines work faster. The men who tend them must do likewise.

America Grows Old.

But arguments are fruitless and meanwhile the problem grows worse. Because of America's declining birth rate, we are rapidly becoming a nation of middle-aged men and women; by 1960 it is estimated 36 per cent will be over 40!

Industry and government have not been blind to the problem. First they favored social security, but its result has been higher taxes and a subsequent demand for more efficiency and fewer workers. They tried old-age pensions, but it was poor business to hire a man at 40 when he'd be retired in a few years. They tried sharing the work, which reduced efficiency and proved an expensive proposition. And the century-old trend to shorter work weeks has defeated itself because it brought labor-saving machinery.

The solution is not yet. Some say only an intricate balancing act can overcome the problem, a comprehensive system of social insurance to keep men employed or keep them fed when jobless. Though many remedies have been, and will be of-

fered, the man over 40 has thus far received little but sympathy.

One man has scoffed at sympathy. He is Henry Simler, a New York typewriter manufacturer, who recently began fighting the "fortyphobia" menace by proving that men over 40 can compete with their younger colleagues and do a good job of it. To employers from coast to coast he sent a comprehensive questionnaire to learn what employers have actually learned about the relation of age to efficiency.

He discovered that youth is more careful about its appearance, is more cheerful and more enthusiastic. But for loyalty, conscientiousness, willingness and results, the man over 40 won by a wide margin. With these facts he set out to form a nation-wide organization of Forty-Plus clubs, groups who would break down employer resistance in their respective communities.

Flooring "Fortyphobia."

What happened in Boston is typical. At the first meeting of this Forty-Plus club was a small group of unemployed men, mostly of the executive type. One was 46, a Dartmouth graduate with manufacturing and retailing experience. A second was 42, formerly vice president of a drug company. A third had wide experience in public relations work. They decided to tackle the problem from the inside out, to find jobs for each other by capitalizing on Simler's survey and selling themselves to the public and employers.

They scoffed publicly at the "Help Wanted" advertiser who sought a technical college graduate with at least 15 years' experience in one specialized line and who "must not be over 35." What this employer wanted, they said, was an unemployed genius who finished college at 20. One "Forty-Pluser" administered a verbal thrashing to a man who had turned him down for lack of experience only 10 years ago, and who now said he was too old.

Boston's Payoff.

Their campaign brought results, too. After six weeks, five Forty-Plus club members had permanent positions, one of them paying \$6,000 a year. Automatically these men were suspended from membership, since this strange organization is anxious to "kick out" its brothers in the bond as rapidly as possible, thereby making room for new men.

Some employers express a hope that the "fortyphobia" problem will work its own way out. They claim the present crisis is only a temporary, violent reaction to the modern trend of thought which favors work for the young man and leisure for old age.

Meanwhile, the man over 40 is being given the attention he deserves. Massachusetts has empowered its department of labor to publish the names of employers who discriminate against certain persons on account of age. And Secretary of Labor Perkins has added her opinion that "it is against common sense to leave people of 40, 45 and 50 out of work when they are willing and able to work."

But perhaps employers have a just reason to discriminate. Before America can solve this great social problem, she must find the true cause.

What to Eat and Why

C. Houston Goudiss Offers Timely Advice On Avoiding the Menace of Tooth Decay

By C. HOUSTON GOUDISS

ONE of the most serious indictments against our present-day civilization is its failure to preserve the teeth of men, women and children. Countless examinations in all parts of the country reveal that practically 100 per cent of the adult population is afflicted with some form of oral disease. And surveys of the physical condition of school pupils in different localities and under various circumstances disclose that tooth decay affects between 90 and 97 per cent of our school children.

Remarkable and widely heralded advances have been made in our knowledge of how to control and prevent many dangerous and debilitating diseases. Yet we appear to be complacent in the face of the fact that the majority of our population is handicapped by decayed teeth!

Nor does the mere statement of the case convey any idea of the seriousness of the situation. For it is unfortunate that diseased teeth and dental infections which may result from unchecked decay, seldom incapacitate the sufferer. Thus the victim does not become sufficiently alarmed to take the steps necessary to arrest the progress of the diseased condition.

Yet a single decayed tooth might be compared to a poison factory, distributing its noxious products to every part of the body, and tooth decay may be indirectly responsible for rheumatic ailments, neuritis, dyspepsia or duodenal ulcers. It may be a contributing cause of heart trouble.

Possibilities of Prevention

Yet there is little or no excuse for the appalling amount of dental decay that afflicts the American people. For in recent years a vast amount of laboratory and clinical research has been undertaken in this field and there is impressive evidence that dental caries, or decay, may be completely controlled by dietary means. Then, too, our understanding of correct dental hygiene has advanced tremendously, and scientifically designed tooth brushes and skillfully compounded dentifrices are available in every town and hamlet throughout the country.

Diet and Dental Disease

Various investigators have advocated different dietary formulas for the control of dental decay. There is a lack of agreement among them as to which single element is the most important in constructing a diet to prevent caries.

But outstanding authorities hold that each of the five following dietary factors has a controlling influence: vitamins A, C and D; an adequate supply, in the correct proportions, of the minerals, calcium and phosphorus; an excess of alkaline or base-forming foods over acid-forming foods; and a generous allowance of raw foods, with emphasis on those that leave an alkaline-ash.

Vitamin A and Tooth Structure

Notable research has demonstrated that vitamin A is a definite factor in controlling tooth development. The development of the enamel is governed by a complex structure which begins to deteriorate as soon as vitamin A is withheld. When experimental animals are placed on a diet lacking in this vitamin, their teeth become brittle, chalky and white. This is due to the loss of the enamel, with its orange colored pigment, and the exposure of the dentine.

An English authority also claims that vitamin A is necessary to help prevent diseases of the gums.

Inasmuch as vitamin A likewise has many other important functions to perform in the body, every homemaker should see to it that her meals contain an abundance of milk and other dairy products, and the green, leafy and yellow vegetables which are a good source of this vitamin.

Vitamin C and Tooth Health

Vitamin C is closely associated with the health of both teeth and gums. There is strong evidence

that this vitamin is essential to the dentine, enamel, cementum and the bone of the jaw. And there are on record remarkable experiments which demonstrate that dental decay and gum disorders are both prevented and arrested when extra amounts of foods containing vitamin C are included in a well-balanced diet.

Vitamin C is best obtained from the citrus fruits, tomatoes and raw leafy vegetables such as cabbage.

Vitamin D which we get from the sun, from fish-liver oils and concentrates, and from irradiated foods and those fortified with vitamin D concentrate, is necessary for the proper utilization of the calcium and phosphorus, which must be generously supplied if the teeth are to develop properly.

Importance of Dental Hygiene

Thus a carefully calculated diet, beginning before birth and continuing throughout life, is necessary to build teeth that are structurally sound. But even the most perfect teeth require constant care to maintain their soundness.

Thorough brushing is necessary after every meal to remove all particles of food which remain between the crevices and cling near the necks of the teeth. If not removed, this debris may ferment, giving rise to unpleasant odors and creating acids which may attack the tooth enamel.

It is important, however, that the brushing be done correctly, away from the gums and with a slight rolling stroke, so that the

TINLEY PARK

IT MAY BE D-E-A-D TOMORROW MORNING IF IT'S WEAK TODAY!

Give your battery the benefit of the doubt. We have installed a new Weidenhoff 12-battery capacity charger to meet your needs. Bring your battery in before it is too late. But if it does 'pass away in the night,' call us for prompt service.
